

Contents

Preface	v
Introduction	1
I The Neumann Problem	15
1 L^2 -Theory	19
2 L^p -Theory	33
3 Inhomogeneous Boundary Conditions	43
4 Sections of Vector Bundles	53
II Weak Compactness	77
5 Regularity for 1-Forms	77
6 Uhlenbeck Gauge	91
7 Patching	107
III Strong Compactness	125
8 Local Slice Theorems	125
9 Yang-Mills Connections	141
10 Proof of Strong Compactness	153
IV Appendix	165
A Gauge Theory	165
B Sobolev Spaces	179
C L^p -Multipliers, Mollifiers, and Poisson Kernels	193
D The Dirichlet Problem	201
E Some Functional Analysis	203
List of Symbols	207
Index	209
Bibliography	211
