Zurich Lectures in Advanced Mathematics

Edited by

Marc Burger (Managing Editor), Erwin Bolthausen, Freddy Delbaen, Thomas Kappeler, Christoph Schwab, Michael Struwe, Gisbert Wüstholz

Mathematics in Zurich has a long and distinguished tradition, in which the writing of lecture notes volumes and research monographs play a prominent part. The *Zurich Lectures in Advanced Mathematics* series aims to make some of these publications better known to a wider audience. The series has three main constituents: lecture notes on advanced topics given by internationally renowned experts, graduate text books designed for the joint graduate program in Mathematics of the ETH and the University of Zurich, as well as contributions from researchers in residence at the mathematics research institute, FIM-ETH. Moderately priced, concise and lively in style, the volumes of this series will appeal to researchers and students alike, who seek an informed introduction to important areas of current research.

Published with the support of the Huber-Kudlich-Stiftung, Zürich

Yakov B. Pesin

Lectures on partial hyperbolicity and stable ergodicity

European Mathematical Society

Author:

Yakov B. Pesin
