

Contents

Preface	v
1 Elliptic integrals	1
2 Elliptic curves	10
2.1 The shape of elliptic curves	12
2.2 Elliptic integrals revisited	18
3 Elliptic functions	24
3.1 Poles and zeroes	32
4 A projective interlude	41
5 The group structure on an elliptic curve	47
6 Equivalence	52
6.1 Equivalences of elliptic curves	52
6.2 Equivalence of periods	54
6.3 The j -function	57
7 Formulaire	68
8 Finite fields	70
8.1 The curve $y^2 = x^3 + 1$	73
8.2 Normal forms and twists	75
9 Division polynomials	78
9.1 Algebraic version	82
10 Torsion points	88
11 Lattice inclusions	94
11.1 Complex multiplication	100
11.1.1 Complex multiplication lattices.	102
11.2 Elliptic curve interpretation	104
12 Modular forms	109
12.1 Elliptic curve interpretation	111
12.2 Modular forms of higher level	114
12.2.1 Sums of four squares.	120

Hints to exercises	125
Solutions to exercises	127
Some further reading	128
Index	129
