EMS Monographs in Mathematics

Editorial Board:

Ivar Ekeland (Pacific Institute, Vancouver, Canada)
Gerard van der Geer (University of Amsterdam, The Netherlands)
Helmut Hofer (Courant Institute, New York, USA)
Thomas Kappeler (University of Zürich, Switzerland)

EMS Monographs in Mathematics is a book series aimed at mathematicians and scientists. It publishes research monographs and graduate level textbooks from all fields of mathematics. The individual volumes are intended to give a reasonably comprehensive and selfcontained account of their particular subject. They present mathematical results that are new or have not been accessible previously in the literature.

Richard Arratia
A.D. Barbour
Simon Tavaré

Logarithmic Combinatorial Structures: a Probabilistic Approach

European Mathematical Society

This book is dedicated to:

Maria and Ari;
Sue, Polly and Eleanor;
Jane, Ella and Richard.

Acknowledgements

The research described in this book has evolved over many years, and after extensive discussions with many colleagues. Our warmest thanks go in particular to Persi Diaconis, Jennie Hansen, Lars Holst, Svante Janson, John Kingman, Bruno Nietlispach, Jim Pitman, Boris Pittel, Gian-Carlo Rota and Dudley Stark for discussions about the combinatorial side of the work, and to Warren Ewens, Bob Griffiths and Geoff Watterson for the population genetics aspects. We are especially indebted to Svante Janson and Jim Pitman for many detailed comments and suggestions, which have materially improved the earlier chapters.

We thank Monash University and the Institute for Mathematical Sciences at the National University of Singapore for their support during the preparation of the manuscript. We also wish to acknowledge generous financial support from the National Science Foundation (RA and ST) and the Schweizerischer Nationalfonds (ADB).
