Introduction	vii
1 Commutative geometry from the noncommutative point of view	1
1.1 The Gelfand–Naimark cofunctors	2
1.2 The Γ functor	4
1.3 Hermitian metrics and spin^c structures	5
1.4 The Dirac operator and the distance formula	8
2 Spectral triples on the Riemann sphere	11
2.1 Line bundles and the spinor bundle	11
2.2 The Dirac operator on the sphere \mathbb{S}^2	13
2.3 Spinor harmonics and the spectrum of \mathcal{D}	15
2.4 Twisted spinor modules	17
2.5 A reducible spectral triple	19
3 Real spectral triples: the axiomatic foundation	21
3.1 The data set	21
3.2 Infinitesimals and dimension	23
3.3 The first-order condition	25
3.4 Smoothness of the algebra	25
3.5 Hochschild cycles and orientation	26
3.6 Finiteness of the K -cycle	27
3.7 Poincaré duality and K -theory	28
3.8 The real structure	30
4 Geometries on the noncommutative torus	32
4.1 Algebras of Weyl operators	32
4.2 The algebra of the noncommutative torus	34
4.3 The skeleton of the noncommutative torus	36
4.4 A family of spin geometries on the torus	38
5 The noncommutative integral	43
5.1 The Dixmier trace on infinitesimals	43
5.2 Pseudodifferential operators	46
5.3 The Wodzicki residue	48
5.4 The trace theorem	49
5.5 Integrals and zeta residues	51

6	Quantization and the tangent groupoid	53
6.1	Moyal quantizers and the Moyal deformation	53
6.2	Smooth groupoids	56
6.3	The tangent groupoid	58
6.4	Moyal quantization as a continuity condition	60
6.5	The hexagon and the analytical index	62
6.6	Quantization and the index theorem	63
7	Equivalence of geometries	65
7.1	Unitary equivalence of spin geometries	65
7.2	Morita equivalence and connections	67
7.3	Vector bundles over noncommutative tori	70
7.4	Morita-equivalent toral geometries	72
7.5	Gauge potentials	74
8	Action functionals	75
8.1	Algebra automorphisms and the metric	75
8.2	The fermionic action	76
8.3	The spectral action principle	78
8.4	Spectral densities and asymptotics	79
9	Epilogue: new directions	85
9.1	Noncommutative field theories	85
9.2	Isospectral deformations	86
9.3	Geometries with quantum group symmetry	90
9.4	Other developments	93
	Bibliography	97
	Index	109
