Introduction . . . . .	1
1 Poisson manifolds and Hamiltonian reduction . . . . .	5
1.1 Poisson manifolds . . . . .	5
1.2 Moment maps . . . . .	6
1.3 Hamiltonian reduction . . . . .	7
1.4 Hamiltonian reduction along an orbit . . . . .	9
1.5 Calogero–Moser space . . . . .	9
1.6 Notes . . . . .	10
2 Classical mechanics and integrable systems . . . . .	11
2.1 Classical mechanics . . . . .	11
2.2 Symmetries in classical mechanics . . . . .	12
2.3 Integrable systems . . . . .	13
2.4 Action-angle variables of integrable systems . . . . .	14
2.5 Constructing integrable systems by Hamiltonian reduction . . . . .	15
2.6 The Calogero–Moser system . . . . .	15
2.7 Coordinates on $\mathcal{C}_n$ and the explicit form of the Calogero–Moser system . . . . .	16
2.8 The trigonometric Calogero–Moser system . . . . .	18
2.9 Notes . . . . .	19
3 Deformation theory . . . . .	21
3.1 Formal deformations of associative algebras . . . . .	21
3.2 Hochschild cohomology . . . . .	21
3.3 Hochschild cohomology and deformations . . . . .	23
3.4 Universal deformation . . . . .	23
3.5 Quantization of Poisson algebras and manifolds . . . . .	24
3.6 Algebraic deformations . . . . .	26
3.7 Notes . . . . .	27
4 Moment maps, Hamiltonian reduction and the Lvasseur–Stafford theorem . . . . .	29
4.1 Quantum moment maps and quantum Hamiltonian reduction . . . . .	29
4.2 Quantum Hamiltonian reduction . . . . .	30
4.3 The Lvasseur–Stafford theorem . . . . .	30
4.4 Hamiltonian reduction with respect to an ideal in $U(\mathfrak{g})$ . . . . .	35
4.5 Quantum reduction in the deformational setting . . . . .	36
4.6 Notes . . . . .	37

5	Quantum mechanics, quantum integrable systems and the Calogero–Moser system . . . . .	39
5.1	Quantum mechanics . . . . .	39
5.2	Quantum integrable systems . . . . .	40
5.3	Constructing quantum integrable systems by quantum Hamiltonian reduction . . . . .	42
5.4	The quantum Calogero–Moser system . . . . .	43
5.5	Notes . . . . .	44
6	Calogero–Moser systems associated to finite Coxeter groups . . . . .	47
6.1	Dunkl operators . . . . .	47
6.2	Olshanetsky–Perelomov operators . . . . .	48
6.3	Classical Dunkl operators and Olshanetsky–Perelomov Hamiltonians . . . . .	50
6.4	Notes . . . . .	52
7	The rational Cherednik algebra . . . . .	53
7.1	Rational Cherednik algebra and the Poincaré–Birkhoff–Witt theorem . . . . .	53
7.2	The spherical subalgebra . . . . .	55
7.3	The localization lemma and the basic properties of $M_c$ . . . . .	55
7.4	The $SL_2$ -action on $H_{t,c}$ . . . . .	56
7.5	Notes . . . . .	57
8	Symplectic reflection algebras . . . . .	59
8.1	The definition of symplectic reflection algebras . . . . .	59
8.2	The PBW theorem for symplectic reflection algebras . . . . .	60
8.3	Koszul algebras . . . . .	60
8.4	Proof of Theorem 8.3 . . . . .	61
8.5	The spherical subalgebra of the symplectic reflection algebra . . . . .	62
8.6	Notes . . . . .	63
9	Deformation-theoretic interpretation of symplectic reflection algebras . . . . .	65
9.1	Hochschild cohomology of semidirect products . . . . .	65
9.2	The universal deformation of $G \ltimes \text{Weyl}(V)$ . . . . .	67
9.3	Notes . . . . .	67
10	The center of the symplectic reflection algebra . . . . .	69
10.1	The module $H_{t,c}e$ . . . . .	69
10.2	The center of $H_{0,c}$ . . . . .	70
10.3	Finite dimensional representations of $H_{0,c}$ . . . . .	70
10.4	Azumaya algebras . . . . .	71
10.5	Cohen–Macaulay property and homological dimension . . . . .	72
10.6	Proof of Theorem 10.10 . . . . .	74

10.7	The space $M_c$ for $G = S_n$ . . . . .	75
10.8	Generalizations . . . . .	77
10.9	Notes . . . . .	78
11	Representation theory of rational Cherednik algebras . . . . .	79
11.1	Rational Cherednik algebras for any finite group of linear transformations . . . . .	79
11.2	Verma and irreducible lowest weight modules over $H_{1,c}$ . . . . .	79
11.3	Category $\emptyset$ . . . . .	81
11.4	The Frobenius property . . . . .	82
11.5	Representations of the rational Cherednik algebra of type $A$ . . . . .	84
11.5.1	The results. . . . .	84
11.5.2	Proof of Theorem 11.16. . . . .	85
11.6	Notes . . . . .	86
	Bibliography . . . . .	87
	Index . . . . .	91
