

### **EMS Series of Lectures in Mathematics**

Edited by Andrew Ranicki (University of Edinburgh, U.K.)

*EMS Series of Lectures in Mathematics* is a book series aimed at students, professional mathematicians and scientists. It publishes polished notes arising from seminars or lecture series in all fields of pure and applied mathematics, including the reissue of classic texts of continuing interest. The individual volumes are intended to give a rapid and accessible introduction into their particular subject, guiding the audience to topics of current research and the more advanced and specialized literature.

Previously published in this series:

Katrin Wehrheim, *Uhlenbeck Compactness*

Torsten Ekedahl, *One Semester of Elliptic Curves*

Sergey V. Matveev, *Lectures on Algebraic Topology*

Joseph C. Várilly, *An Introduction to Noncommutative Geometry*

Reto Müller, *Differential Harnack Inequalities and the Ricci Flow*

Eustasio del Barrio, Paul Deheuvels and Sara van de Geer, *Lectures on Empirical Processes*

Iskander A. Taimanov

# Lectures on Differential Geometry

Translated from the Russian by Gleb V. Dyatlov

European Mathematical Society

Author:

Iskander A. Taimanov  
Mechanics and Mathematics Department  
Chair of Geometry and Topology

Originally published by Institute of Computer Studies, Moscow-Izhevsk 2002, 2006, under the title (Russian)  
Лекции по дифференциальной геометрии

2000 Mathematical Subject Classification (primary; secondary): 53-01; 20C05, 20G20, 37J05, 37J35, 53A10, 53D05, 53D17, 57S17, 58A05

Key words: Differential geometry, Riemannian geometry, smooth manifolds, minimal surfaces, Lie groups, representation theory, symplectic and Poisson geometry, finite-dimensional integrable systems

ISBN 978-3-03719-050-0
