|--|-----------|
| Preface | v |
| Part I Curves and surfaces | 1 |
| 1 Theory of curves | 3 |
| 1.1 Basic notions of the theory of curves | 3 |
| 1.2 Plane curves | 5 |
| 1.3 Curves in three-dimensional space | 8 |
| 1.4 The orthogonal group | 10 |
| 2 Theory of surfaces | 15 |
| 2.1 Metrics on regular surfaces | 15 |
| 2.2 Curvature of a curve on a surface | 17 |
| 2.3 Gaussian curvature | 20 |
| 2.4 Derivational equations and Bonnet's theorem | 22 |
| 2.5 The Gauss theorem | 27 |
| 2.6 Covariant derivative and geodesics | 28 |
| 2.7 The Euler–Lagrange equations | 32 |
| 2.8 The Gauss–Bonnet formula | 38 |
| 2.9 Minimal surfaces | 44 |
| Part II Riemannian geometry | 47 |
| 3 Smooth manifolds | 49 |
| 3.1 Topological spaces | 49 |
| 3.2 Smooth manifolds and maps | 51 |
| 3.3 Tensors | 58 |
| 3.4 Action of maps on tensors | 63 |
| 3.5 Embedding of smooth manifolds into the Euclidean space | 67 |
| 4 Riemannian manifolds | 69 |
| 4.1 Metric tensor | 69 |
| 4.2 Affine connection and covariant derivative | 70 |
| 4.3 Riemannian connections | 74 |
| 4.4 Curvature | 77 |
| 4.5 Geodesics | 83 |

| | | |
|-------------------------------------|--|-----|
| 5 | The Lobachevskii plane and the Minkowski space | 89 |
| 5.1 | The Lobachevskii plane | 89 |
| 5.2 | Pseudo-Euclidean spaces and their applications in physics | 95 |
| Part III Supplement chapters | | 101 |
| 6 | Minimal surfaces and complex analysis | 103 |
| 6.1 | Conformal parameterization of surfaces | 103 |
| 6.2 | The theory of surfaces in terms of the conformal parameter | 107 |
| 6.3 | The Weierstrass representation | 111 |
| 7 | Elements of Lie group theory | 117 |
| 7.1 | Linear Lie groups | 117 |
| 7.2 | Lie algebras | 124 |
| 7.3 | Geometry of the simplest linear groups | 129 |
| 8 | Elements of representation theory | 135 |
| 8.1 | The basic notions of representation theory | 135 |
| 8.2 | Representations of finite groups | 140 |
| 8.3 | On representations of Lie groups | 147 |
| 9 | Elements of Poisson and symplectic geometry | 154 |
| 9.1 | The Poisson bracket and Hamilton's equations | 154 |
| 9.2 | Lagrangian formalism | 163 |
| 9.3 | Examples of Poisson manifolds | 166 |
| 9.4 | Darboux's theorem and Liouville's theorem | 170 |
| 9.5 | Hamilton's variational principle | 177 |
| 9.6 | Reduction of the order of the system | 180 |
| 9.7 | Euler's equations | 190 |
| 9.8 | Integrable Hamiltonian systems | 194 |
| | Bibliography | 205 |
| | Index | 207 |
