

## Zurich Lectures in Advanced Mathematics

### Edited by

Erwin Bolthausen (Managing Editor), Freddy Delbaen, Thomas Kappeler (Managing Editor), Christoph Schwab, Michael Struwe, Gisbert Wüstholz

Mathematics in Zurich has a long and distinguished tradition, in which the writing of lecture notes volumes and research monographs play a prominent part. The *Zurich Lectures in Advanced Mathematics* series aims to make some of these publications better known to a wider audience. The series has three main constituents: lecture notes on advanced topics given by internationally renowned experts, graduate text books designed for the joint graduate program in Mathematics of the ETH and the University of Zurich, as well as contributions from researchers in residence at the mathematics research institute, FIM-ETH. Moderately priced, concise and lively in style, the volumes of this series will appeal to researchers and students alike, who seek an informed introduction to important areas of current research.

Previously published in this series:

Yakov B. Pesin, *Lectures on partial hyperbolicity and stable ergodicity*  
Sun-Yung Alice Chang, *Non-linear Elliptic Equations in Conformal Geometry*  
Sergei B. Kuksin, *Randomly forced nonlinear PDEs and statistical hydrodynamics in 2 space dimensions*  
Pavel Etingof, *Calogero-Moser systems and representation theory*  
Guus Balkema and Paul Embrechts, *High Risk Scenarios and Extremes – A geometric approach*  
Demetrios Christodoulou, *Mathematical Problems of General Relativity I*  
Camillo De Lellis, *Rectifiable Sets, Densities and Tangent Measures*

Published with the support of the Huber-Kudlich-Stiftung, Zürich
