Preface	vii
<b>1 Prerequisites</b>	1
<b>2 Algebraic Sets, Morphisms, and Rational Maps</b>	12
2.1 Review of topology . . . . .	12
2.2 The correspondences $V$ and $I$ . . . . .	15
2.3 Morphisms . . . . .	21
2.4 Rational maps . . . . .	24
2.5 Projective algebraic sets . . . . .	30
2.6 Rational maps and birational equivalence . . . . .	35
2.7 Complements and exercises . . . . .	43
<b>3 Geometric Properties of Algebraic Varieties</b>	51
3.1 Tangent space, singularities and dimension . . . . .	51
3.2 Independence of polynomials. Essential parameters . . . . .	62
3.3 Dimension of a projective variety . . . . .	68
3.4 Order of a projective variety, tangent cone and multiplicity . . . . .	72
<b>4 Rudiments of Elimination Theory</b>	83
4.1 Resultant of two polynomials . . . . .	83
4.2 Bézout's theorem for plane curves . . . . .	89
4.3 More on intersection multiplicity . . . . .	90
4.4 Elimination of several variables . . . . .	99
4.5 Bézout's theorem . . . . .	102
<b>5 Hypersurfaces in Projective Space</b>	106
5.1 Generalities on hypersurfaces . . . . .	106
5.2 Multiple points of a hypersurface . . . . .	108
5.3 Algebraic envelopes . . . . .	115
5.4 Polarity with respect to a hypersurface . . . . .	119
5.5 Quadrics in projective space . . . . .	126
5.6 Complements on polars . . . . .	134
5.7 Plane curves . . . . .	140
5.8 Surfaces in $\mathbb{P}^3$ . . . . .	150

<b>6 Linear Systems</b>	<b>166</b>
6.1 Linear systems of hypersurfaces . . . . .	167
6.2 Hypersurfaces of a linear system that satisfy given conditions . . . . .	168
6.3 Base points of a linear system . . . . .	170
6.4 Jacobian loci . . . . .	177
6.5 Simple, composite, and reducible linear systems . . . . .	182
6.6 Rational mappings . . . . .	185
6.7 Projections and Veronese varieties . . . . .	189
6.8 Blow-ups . . . . .	192
<b>7 Algebraic Curves</b>	<b>197</b>
7.1 Generalities . . . . .	197
7.2 The genus of an algebraic curve . . . . .	201
7.3 Curves on a quadric . . . . .	212
7.4 Rational curves . . . . .	218
7.5 Exercises on rational curves . . . . .	225
<b>8 Linear Series on Algebraic Curves</b>	<b>238</b>
8.1 Divisors on an algebraic curve with ordinary singularities . . . . .	239
8.2 Linear series . . . . .	246
8.3 Linear equivalence . . . . .	248
8.4 Projective image of linear series . . . . .	252
8.5 Special linear series . . . . .	256
8.6 Adjoints and the Riemann–Roch theorem . . . . .	261
8.7 Properties of the canonical series and canonical curves . . . . .	270
8.8 Some results on algebraic correspondences between two curves . . . . .	274
8.9 Some remarks regarding moduli . . . . .	278
8.10 Complements and exercises . . . . .	284
<b>9 Cremona Transformations</b>	<b>292</b>
9.1 Quadratic transformations between planes . . . . .	292
9.2 Resolution of the singularities of a plane algebraic curve . . . . .	297
9.3 Cremona transformations between planes . . . . .	307
9.4 Cremona transformations between projective spaces of dimension 3	317
9.5 Exercises . . . . .	322
<b>10 Rational Surfaces</b>	<b>340</b>
10.1 Planar representation of rational surfaces . . . . .	340
10.2 Linearly normal surfaces and their projections . . . . .	349
10.3 Surfaces of minimal order . . . . .	354
10.4 The conics of a plane as points of $\mathbb{P}^5$ and the Veronese surface . .	360
10.5 Complements and exercises . . . . .	364

<b>11 Segre Varieties</b>	386
11.1 The product of two projective lines . . . . .	386
11.2 Segre morphism and Segre varieties . . . . .	389
11.3 Segre product of varieties . . . . .	392
11.4 Examples and exercises . . . . .	395
<b>12 Grassmann Varieties</b>	399
12.1 The lines of $\mathbb{P}^3$ as points of a quadric in $\mathbb{P}^5$ . . . . .	399
12.2 Complexes of lines in $\mathbb{P}^3$ . . . . .	403
12.3 Congruences of lines in $\mathbb{P}^3$ . . . . .	407
12.4 Ruled surfaces in $\mathbb{P}^3$ . . . . .	408
12.5 Grassmann coordinates and Grassmann varieties . . . . .	414
12.6 Further properties of $\mathbb{G}(1, n)$ and applications . . . . .	422
<b>13 Supplementary Exercises</b>	433
13.1 Miscellaneous exercises . . . . .	433
13.2 Further problems . . . . .	454
13.3 Exercises on linear series on curves . . . . .	457
Bibliography	467
Index	475
