Introduction ix

I Algebras and modules 1
1 Algebras . . . 1
2 Representations of algebras and modules . . . 12
3 The Jacobson radical . . . 30
4 The Krull–Schmidt theorem . . . 41
5 Semisimple modules . . . 45
6 Semisimple algebras . . . 56
7 The Jordan–Hölder theorem . . . 67
8 Projective and injective modules . . . 73
9 Hereditary algebras . . . 93
10 Nakayama algebras . . . 100
11 The Grothendieck group and the Cartan matrix . . . 105
12 Exercises . . . 109

II Morita theory 123
1 Categories and functors . . . 123
2 Bimodules . . . 125
3 Tensor products of modules . . . 133
4 Adjunctions and natural isomorphisms . . . 140
5 Progenerators . . . 151
6 Morita equivalence . . . 157
7 Morita–Azumaya duality . . . 175
8 Exercises . . . 188

III Auslander–Reiten theory 203
1 The radical of a module category . . . 203
2 The Harada–Sai lemma . . . 207
3 The space of extensions . . . 209
4 The Auslander–Reiten translations . . . 232
5 The Nakayama functors . . . 247
6 The Auslander–Reiten formulas . . . 252
7 Irreducible and almost split homomorphisms . . . 257
8 Almost split sequences . . . 269
9 The Auslander–Reiten quiver . . . 282
10 The Auslander theorem . . . 301

11 The Bautista–Smalø theorem 312
12 Exercises 314

IV Selfinjective algebras 332
1 The Frobenius theorem 332
2 The Brauer–Nesbitt–Nakayama theorems 336
3 Frobenius algebras 345
4 Symmetric algebras 355
5 Simple algebras 368
6 The Nakayama theorems 375
7 Non-Frobenius selfinjective algebras 386
8 The syzygy functors 392
9 The higher extension spaces 402
10 Periodic modules 414
11 Periodic algebras 427
12 The Green–Snashall–Solberg theorems 442
13 Dynkin and Euclidean graphs 447
14 Canonical mesh algebras of Dynkin type 452
15 The Riedtmann–Todorov theorem 455
16 Exercises 470

V Hecke algebras 489
1 Finite reflection groups 489
2 Coxeter graphs 499
3 The Coxeter theorems 507
4 The Iwahori theorem 515
5 Hecke algebras 528
6 Exercises 533

VI Hopf algebras 539
1 Coalgebras 539
2 Hopf algebras 552
3 The Larson–Sweedler theorems 584
4 The Radford theorem 595
5 The Fischman–Montgomery–Schneider formula 609
6 The module category 616
7 Exercises 630
