0	Introduction	1
1	Lattice theory	9
1.1	Basic properties	9
1.2	Classification of indefinite unimodular lattices	16
1.3	Embeddings of lattices	20
2	Reflection groups and their fundamental domains	27
2.1	Reflection groups and fundamental domains	27
2.2	Reflection groups associated with lattices	32
3	Complex analytic surfaces	35
3.1	Basics of complex analytic surfaces	35
3.2	Classification of complex analytic surfaces	41
3.3	Elliptic surfaces and their singular fibers	44
4	<i>K3</i> surfaces and examples	55
4.1	Definition and examples of <i>K3</i> surfaces	55
4.2	Reflection group associated with non-singular rational curves and the Kähler cone	60
4.3	Kummer surfaces	62
4.4	The Kummer surface associated with a curve of genus 2	65
4.5	Torelli theorem for 2-dimensional complex tori	68
5	Bounded symmetric domains of type IV and deformations of complex structures	75
5.1	Bounded symmetric domains of type IV	75
5.2	Deformations of complex structures and the Kodaira–Spencer map	80
6	The Torelli-type theorem for <i>K3</i> surfaces	87
6.1	Periods of <i>K3</i> surfaces and the Torelli-type theorem	87

6.2	Local isomorphism of the period map (local Torelli theorem) . . . . .	91
6.3	The Torelli-type theorem for Kummer surfaces . . . . .	94
6.4	Density of the periods of Kummer surfaces . . . . .	103
6.5	Behavior of the Kähler cones under a deformation . . . . .	109
6.6	Proof of the Torelli-type theorem for $K3$ surfaces . . . . .	112
<b>7</b>	<b>Surjectivity of the period map of <math>K3</math> surfaces . . . . .</b>	<b>119</b>
7.1	The period map of marked Kähler $K3$ surfaces . . . . .	119
7.2	Surjectivity of the period map of $K3$ surfaces . . . . .	120
7.3	Outline of a proof of the surjectivity of the period map of projective $K3$ surfaces . . . . .	122
<b>8</b>	<b>Application of the Torelli-type theorem to automorphisms . . . . .</b>	<b>127</b>
8.1	Automorphism group of a projective $K3$ surface . . . . .	127
8.2	Action of the automorphism group on the transcendental lattice . .	128
8.3	A finite group that can be realized as an automorphism group of a $K3$ surface . . . . .	133
8.4	Automorphisms of $K3$ surfaces of order 2 . . . . .	134
<b>9</b>	<b>Enriques surfaces . . . . .</b>	<b>137</b>
9.1	Periods of Enriques surfaces . . . . .	137
9.2	Non-singular rational curves and elliptic curves on Enriques surfaces	147
9.3	Automorphism groups of Enriques surfaces . . . . .	152
9.4	Examples of Enriques surfaces . . . . .	155
<b>10</b>	<b>Application to the moduli space of plane quartic curves . . . . .</b>	<b>171</b>
10.1	Plane quartics and del Pezzo surfaces of degree 2 . . . . .	171
10.2	$K3$ surfaces associated with plane quartics . . . . .	180
10.3	The moduli space of plane quartics and a complex ball . . . . .	184
<b>11</b>	<b>Finite groups of symplectic automorphisms of <math>K3</math> surfaces and the Mathieu group . . . . .</b>	<b>191</b>
11.1	Niemeier lattices and the Mathieu group . . . . .	191
11.2	Finite symplectic automorphisms and the Mathieu group . . . . .	195
<b>12</b>	<b>Automorphism group of the Kummer surface associated with a curve of genus 2 . . . . .</b>	<b>201</b>
12.1	The Leech lattice and the even unimodular lattice of signature $(1, 25)$	201
12.2	Néron–Severi lattice of the Kummer surface . . . . .	204
12.3	Classical automorphisms of the Kummer surface . . . . .	207

12.4 The Kummer surface and the Leech roots . . . . .	209
12.5 Automorphism group of a generic Kummer surface . . . . .	215
Bibliography . . . . .	223
Index . . . . .	231
