EMS Textbooks in Mathematics

The *EMS Textbooks in Mathematics* is a series of books aimed at students or professional mathematicians seeking an introduction into a particular field. The individual volumes are intended not only to provide relevant techniques, results, and applications, but also to afford insight into the motivations and ideas behind the theory. Suitably designed exercises help to master the subject and prepare the reader for the study of more advanced and specialized literature.

Peter Kunkel and Volker Mehrmann, *Differential-Algebraic Equations*
Markus Stroppel, *Locally Compact Groups*
