

Contents

Overview	1
Chapter I. Zakharov-Shabat operators	7
1 Fundamental solution	7
2 Estimates	12
3 Gradients	16
4 Discriminant	19
Chapter II. Spectra	26
5 Dirichlet and Neumann spectrum	26
6 Periodic spectrum	29
7 Potentials of real type	36
8 Poisson brackets	46
9 Isospectral sets	52
10 Canonical coordinate system	55
Chapter III. Liouville coordinates	62
11 Motivation	62
12 Potentials of almost real type	65
13 Actions	76
14 Psi-Functions	84
15 Angles	97
Chapter IV. Birkhoff coordinates	105
16 Analyticity	105
17 Jacobian	111
18 Canonical relations	114
19 Diffeomorphism property	121
20 Normal form	124
Appendices	128
Appendix A Analytic maps	128
Appendix B Hamiltonian formalism	135
Appendix C Infinite products	141
Appendix D Fourier coefficients	147
Appendix E Multiplicities of eigenvalues	149
Appendix F Miscellaneous lemmas	151

References	157
Index	164
Notations	164
