

## EMS Monographs in Mathematics

Edited by

Ivar Ekeland (Pacific Institute, Vancouver, Canada)

Gerard van der Geer (University of Amsterdam, The Netherlands)

Helmut Hofer (Institute for Advanced Study, Princeton, USA)

Thomas Kappeler (University of Zürich, Switzerland)

*EMS Monographs in Mathematics* is a book series aimed at mathematicians and scientists. It publishes research monographs and graduate level textbooks from all fields of mathematics. The individual volumes are intended to give a reasonably comprehensive and selfcontained account of their particular subject. They present mathematical results that are new or have not been accessible previously in the literature.

Previously published in this series:

Richard Arratia, A.D. Barbour and Simon Tavaré, *Logarithmic Combinatorial Structures: A Probabilistic Approach*

Demetrios Christodoulou, *The Formation of Shocks in 3-Dimensional Fluids*

Sergei Buyalo and Viktor Schroeder, *Elements of Asymptotic Geometry*

Demetrios Christodoulou, *The Formation of Black Holes in General Relativity*

Joachim Krieger and Wilhelm Schlag, *Concentration Compactness for Critical Wave Maps*
