The Authors vii

Foreword ix

General introduction xiii

A Riemann surfaces 1

I Antecedent works 3

II Riemann 25

III Riemann surfaces and Riemannian surfaces 75

IV Schwarz's contribution 97

Intermezzo 113

V The Klein quartic 115

B The method of continuity 139

VI Fuchsian groups 149

VII The "method of continuity" 181

VIII Differential equations and uniformization 199

IX Examples and further developments 235

Intermezzo 281

X Uniformization of surfaces 283

C Towards the general uniformization theorem 321
XI Uniformization of functions 333
XII Koebe's proof of the uniformization theorem 353
XIII Poincaré's proof of the uniformization theorem 361
Epilogue 377

Appendices 383
The correspondence between Klein and Poincaré 385
Some historical reference points 417

Bibliography 441

Index 471
