

Contents

Introduction	1
1 Homological background	5
1 A_∞ - and A_n -structures	5
2 Homological perturbation	10
3 Relation of A_∞ -structures to Hochschild cohomology	13
4 Massey products for A_∞ -categories and twisted objects	18
5 Triangulated structure and generators	22
6 Cyclic A_∞ -structures	28
7 G -invariant A_∞ -structures	33
2 Moduli spaces of A_∞-structures	39
8 The moduli problem	39
9 Nice quotients	41
10 Representability theorem	44
11 A_∞ -structures with a segment of defining higher products	50
12 A class of minimally nonformal algebras	53
3 A_∞-structures and moduli of curves	61
13 Examples of calculations for curves	61
14 A_∞ -structures and curves with nonspecial divisors	71
15 Representability of the moduli of A_∞ -structures	81
16 Comparison of the moduli spaces via deformation theory	84
17 Invariants of curves via A_∞ -structures	98
18 Case $n = g$	104
19 Case of genus 0	123
20 Case of genus 1	130
21 Hyperelliptic moduli	139

4 Pairs of 1-spherical objects, A_∞ -structures, and Yang–Baxter equations 145

22 A_∞ -structures associated with 1-spherical pairs 145

23 Solutions of the associative Yang–Baxter equation and 1-spherical pairs 149

24 Another approach to the moduli space of A_∞ -structures 156
