Preface vii

1 Introduction 1
1.1 Problem (KW-1) 2
1.2 Problem (KW-2) 3
1.3 Variational analysis of (KW-2) 4
1.4 Sub-critical approximation and blow-up analysis 6
1.5 Some general existence results 8

2 Preliminaries 11
2.1 A quick review of differential geometry 11
2.2 Conformal changes of metric 16
2.3 Hölder and Sobolev spaces on closed manifolds 17
2.4 Regularity and existence theory for linear elliptic operators 18
2.5 Regularity of weak solutions to some non-linear equations 19

3 The Yamabe quotient and resolution of (KW-1) 23
3.1 On the first eigenvalue of L_g and the Yamabe quotient 23
3.2 Spherical decreasing rearrangement 27
3.3 The Yamabe quotient of the standard sphere 31
3.4 Existence of Yamabe metrics 33
3.5 Proof of Theorem A 38

4 Variational structure of (KW-2) 41
4.1 Existence and uniqueness for non-positive curvatures 41
4.2 Variational approach in positive curvature 43
4.3 Proof of Theorem B 47

5 Classification of entire solutions in the Euclidean space 51
5.1 Moving planes and moving spheres 51
5.2 Liouville theorem in the sub-critical case 56

6 Blow-up analysis 61
6.1 Isolated and isolated-simple blow-ups 62
6.2 Blow-up analysis in dimensions 3 and 4 70

7 Finite-dimensional reduction of $(E_{K,\tau})$ 77
7.1 Lyapunov–Schmidt reduction 78
7.2 Existence of blowing-up solutions to $(E_{K,\tau})$ 83
7.3 Blow-up analysis in arbitrary dimension 86

8 General existence results for (E_K) 91
8.1 Proof of Theorem C 91
8.2 Existence results via min-max theory 96
8.3 Proof of Theorem D 101

9 Forbidden curvatures 107
9.1 First non-existence results 107
9.2 Forbidden functions with a given Morse structure 109
9.3 Blow-up analysis via study of singular solutions 113

10 Related directions and perspectives 119
10.1 Blow-up analysis in general dimensions 119
10.2 Morse theory and Morse homology 120
10.3 Higher-order and fully non-linear versions 122
10.4 Manifolds with boundary 124
10.5 The complete case 126
10.6 The Einstein constraint equations 127

A Some useful results 131
A.1 Pohozaev's identity 131
A.2 Kazdan–Warner identity 133
A.3 A rigidity result 135
