

# Index

- analytic
  - functional ..... 18
  - vectors .....  $\mathcal{D}^\omega$ , 18, 73
- bundle
  - of Lie groups .....  $\mathcal{K}$ , 31
  - of Lie algebras .....  $\mathfrak{K}$ , 31
  - of simple Lie algebras .....  $\widehat{\mathfrak{K}}$ , 34
  - principal .....  $\Xi$ , 32
  - adjoint (groups) .....  $\text{Ad}(\Xi)$ , 32
  - adjoint (Lie algebra) .....  $\text{ad}(\Xi)$ , 32
  - of co-invariants .....  $\mathbb{V}$ , 36
  - of groups over  $\mathbb{S}^1$  .....  $\mathcal{K}_\Phi$ , 85
- Cartan subgroup ..... 127
- central charge .....  $c$ , 125
- central extension
  - of Lie groups .....  $G^\sharp$ , 16
  - of Lie algebras .....  $\mathfrak{g}^\sharp$ , 16
- circle group .....  $\mathbb{T}$ , 16
- co-invariants .....  $V(\mathfrak{f})$ , 36
- cocycle .....  $\omega_{\lambda, \nabla}$ , 37
- cohomology .....  $H^n(\mathfrak{g}, \mathbb{R})$ , 17
- current .....  $\lambda$ , 37
- direct limit  $C^*$ -algebra .....  $\mathcal{B}$ , 117
- double extension .....  $\widehat{\mathfrak{g}}$ , 20
- exponential function .....  $\exp$ , 14
- fixed point set .....  $\Sigma$ , 90
- flat loops .....  $G_{\text{cs}}$ , 106
- flowbox .....  $I \times U_0$ , 39
- gauge algebra
  - smooth .....  $\Gamma(M, \mathfrak{R})$ , 31
  - compact support .....  $\Gamma_c(M, \mathfrak{R})$ , 31
  - quadratic .....  $L_{B\mu}^2(M, \mathfrak{R})$ , 59
  - bounded quadratic .....  $L_b^2(N, \mathfrak{R})$ , 64
  - Sobolev .....  $H_{B\mu}^k(M, \mathfrak{R})$ , 62
  - bounded Sobolev .....  $H_b^k(M, \mathfrak{R})$ , 66
  - $1/\sqrt{t}$  decay .....  $H_\partial^k(N, \mathfrak{R})$ , 68
- gauge group
  - compact support .....  $\Gamma_c(M, \mathcal{K})$ , 31
- geometric  $\mathbb{R}$ -action .....  $\alpha$ , 33
- geometric derivation .....  $D$ , 33
- ground state vector .....  $\Omega$ , 109
- Hamiltonian
  - plain .....  $H$ , 21
  - shifted .....  $\Gamma_\xi, A$ , 59
- Hilbert space .....  $\mathcal{H}$ , 14
- holonomy ..... 85
- invariant bilinear form
  - normalized .....  $\kappa$ , 36
  - universal .....  $\kappa$ , 36
- Lie algebra
  - locally convex ..... 14
  - absolutely simple ..... 36
- Lie connection .....  $\nabla$ , 36
- Lie group
  - locally convex ..... 5, 14
  - locally exponential ..... 14
- loop algebra
  - twisted .....  $\mathcal{L}_\varphi(\mathfrak{f})$ , 86
  - $T$ -periodic .....  $\mathcal{L}_\varphi^T(\mathfrak{f})$ , 125
- loop group
  - of  $K$  .....  $\mathcal{L}(K)$ , 105
  - twisted .....  $\mathcal{L}_\Phi(K)$ , 86
  - $T$ -periodic .....  $\mathcal{L}_\Phi^T(K)$ , 88, 125
  - extended .....  $\mathcal{L}_\varphi^\sharp(K)$ , 93
  - Kac-Moody .....  $\widehat{\mathcal{L}}_\varphi(K)$ , 93
  - flat .....  $G_{\text{cs}}$ , 105
  - pointed .....  $G_{\text{cs}*}$ , 107
- Mackey completeness ..... 27
- maximal
  - torus .....  $T, T^\sharp$ , 95
  - abelian subalgebra .....  $\mathfrak{t}$ , 95, 125
- measure associated to cocycle .....  $\mu$ , 44
- minimal energy subspace .....  $\mathcal{E}$ , 94

- norm
  - Sobolev .....  $q_k$ , 62
  - bounded Sobolev .....  $p_k$ , 66
  
- period homomorphism .....  $\text{per}_\omega$ , 82
- positive energy cone .....  $\mathcal{C}$ , 22
- projective Hilbert space .....  $\mathbb{P}(\mathcal{H})$ , 15
- projective unitary group .....  $\text{PU}(\mathcal{H})$ , 15
  
- representation
  - unitary .....  $(\rho, \mathcal{H})$ , 14
  - projective unitary .....  $(\bar{\rho}, \mathcal{H})$ , 15
  - derived .....  $(\mathfrak{d}\rho, \mathcal{H}^\infty)$ , 15
  - \*-representation .....  $(\rho, \mathcal{D})$ , 18
  - continuous ..... 14
  - strongly continuous ..... 18
  - smooth ..... 14
  - continuous projective ..... 15
  - smooth projective ..... 15
  - positive energy ..... 22
  - projective positive energy ..... 21
  - projective \*-representation ..... 19
  - basic ..... 93
  - bounded ..... 15
  - ground state ..... 109
  - holomorphically induced ..... 95
  - minimal ..... 25
  - periodic ..... 93
  - semibounded ..... 71
  - vacuum ..... 109, 133
- roots
  - set of .....  $\Delta$ , 125
  - positive system .....  $\Delta^+$ , 95, 126
  
- smooth
  - function ..... 13
  - vectors .....  $\mathcal{H}^\infty$ , 14
- spectral gap condition ..... 116
- support of representation ..... 90
  
- twisted conjugation .....  $g * k$ , 127
  
- unitary group .....  $\text{U}(\mathcal{H})$ , 14
- upper semi-continuous density .....  $B_\varepsilon$ , 56
  
- vertical automorphism ..... 32
  
- weak product
  - group .....  $\prod'_{n \in \mathbb{N}} G_n$ , 114, 131
  - box topology ..... 131
