

# Contents

<b>Preamble</b> .....	1
<b>1 Introduction to the mathematical setting and main results</b> .....	5
1.1 Efficiency functionals .....	7
1.2 Prey at forager starting position and change of monotonicity .....	11
1.3 Prey in proximity of the forager .....	14
1.4 Foragers and targets uniformly distributed in some regions .....	18
<b>2 Mathematical framework for the efficiency functionals</b> .....	21
2.1 Preliminary results and asymptotics .....	21
2.2 Structural results for the efficiency functionals .....	26
<b>3 Proof of the main results</b> .....	53
3.1 Proof of the results in Section 1.2 .....	53
3.2 Proof of the results in Sections 1.3 and 1.4 .....	60
<b>A Green function for the Dirichlet spectral fractional Laplacian</b> .....	73
<b>B Some explicit formulas for the one-dimensional functionals</b> .....	77
<b>C Alternative proof of Proposition 1.2</b> .....	81
<b>D Some technical results</b> .....	85
<b>References</b> .....	89
