Preface v

Introduction 1

1 Stochastic areas and Brownian winding functionals 5
1.1 The Lévy area formula and some of its generalizations 5
1.2 Brownian winding functionals 24
1.3 Matrix generalizations 46
Notes and references 49

2 Brownian motions on Lie groups and Riemannian manifolds 51
2.1 Brownian motions on Lie groups 51
2.2 Brownian motions on Riemannian manifolds 54
2.3 Semimartingales and stochastic line integrals 57
2.4 Examples of Riemannian Brownian motions 58
2.5 The unitary Brownian motion 63
Notes and references 71

3 Horizontal Brownian motions 73
3.1 Riemannian submersions and horizontal Brownian motions 73
3.2 Pathwise construction of the horizontal Brownian motion on Riemannian foliations 83
3.3 Horizontal Brownian motions and sub-Riemannian geometry 89
3.4 Examples of horizontal Brownian motions 93
3.5 Horizontal Brownian motion on principal bundles 104
Notes and references 114

4 Horizontal Brownian motions of the Hopf and anti–de Sitter fibrations 115
4.1 Complex Hopf fibration 115
4.2 Complex anti–de Sitter fibration 140
Notes and references 156

5 Horizontal Brownian motions of the quaternionic Hopf fibrations 157
5.1 Stochastic area process on the quaternionic projective spaces $\mathbb{H}P^n$ . . 157
5.2 The horizontal heat kernel on the twistor space of $\mathbb{H}P^n$ 185
Notes and references 188

6 Horizontal Brownian motions of the quaternionic anti–de Sitter fibrations 189
6.1 Stochastic area process on the quaternionic hyperbolic space $\mathbb{H}H^n$ . . 189
6.2 The horizontal heat kernel on the twistor space of $\mathbb{H}H^n$ 212
Notes and references 214

7 Horizontal Brownian motions of the octonionic Hopf and anti–de Sitter fibrations 215
7.1 Horizontal Brownian motion of the octonionic Hopf fibration 215
7.2 Horizontal Brownian motion of the octonionic anti–de Sitter fibration 225
Notes and references 231

8 Horizontal Brownian motions of the Stiefel fibrations 233
8.1 Brownian motion on the complex Grassmannian space 233
8.2 Skew-product decomposition of the Brownian motion of the Stiefel fibration 251
8.3 Limit theorems 254
Notes and references 265

9 Horizontal Brownian motions of the hyperbolic Stiefel fibration 267
9.1 Brownian motion on hyperbolic complex Grassmannian manifolds . . 267
9.2 Long-time behavior and distribution of the functional $\int_0^t \mathrm{tr}(J(s))\,ds$. 279
9.3 Skew-product decompositions, generalized stochastic areas, and asymptotic windings 287
9.4 Appendix: The full expansion of the Laplace transform in the rank-one case 292
Notes and references 295

A A primer on stochastic calculus 297
A.1 Stochastic processes and Brownian motion 297
A.2 Martingales 299
A.3 Stochastic integration 301
A.4 Itô's formula 304
A.5 Girsanov's theorem 304
A.6 Stochastic differential equations and diffusion processes 306
A.7 Stratonovich stochastic differential equations and the language of vector fields 308
A.8 Hörmander's theorem 310
A.9 Additive functionals of diffusion processes and Yor's transforms 311

B Special diffusions 315
B.1 Bessel diffusions 315
B.2 Spherical Jacobi diffusions and heat kernels on spheres 315
B.3 Hyperbolic Jacobi diffusions and heat kernels on hyperbolic spaces . . 321
B.4 Matrix Jacobi diffusions 323

C Radial part of the Laplacian in rank-one symmetric spaces 327

References 329
