EMS Series in Industrial and Applied Mathematics

Edited by Alfredo Bermúdez de Castro (Universidade de Santiago de Compostela), Lorenz T. Biegler (Carnegie Mellon University), Annalisa Buffa (École Polytechnique Fédérale de Lausanne), Matthias Heinkenschloss (Rice University), Alexander Martin (Universität Erlangen-Nürnberg), Volker Mehrmann (Technische Universität Berlin), Stephen B. G. O'Brien (University of Limerick)

The EMS Series in Industrial and Applied Mathematics publishes high quality advanced texts and monographs in all areas of industrial and applied mathematics. Books include those of a general nature as well as those dealing with the mathematics of specific applications areas and real-world situations. While it is intended to disseminate scholarship of the highest standard, authors are encouraged to make their work as accessible as possible.

Previously published in this series:

1 P. Deuflhard, M. Grötschel, D. Hömberg, U. Horst, J. Kramer, V. Mehrmann, K. Polthier, F. Schmidt, C. Schütte, M. Skutella, J. Sprekels (Eds.), *MATHEON – Mathematics for Key Technologies*
2 A. Morsi, A. Pirsing (Eds.), *Decision Support Systems for Water Supply Systems*
3 M. Garrione, F. Gazzola (Eds.), *Interactions between Elasticity and Fluid Mechanics*

Topology and AI

Topological Aspects of Algorithms for Autonomous Motion

Edited by
Michael Farber
Jesús González
