<b>1 Convergence and asymptotic approximations to universal distributions in probability . . . . .</b>	1
<i>by F. Götze, H. Kösters</i>	
1.1 Introduction . . . . .	1
1.2 Symmetric random matrices . . . . .	5
1.3 Non-symmetric random matrices . . . . .	8
1.4 Local spectral distributions . . . . .	12
1.5 Connections between probability theory and number theory . . . . .	16
1.6 Analogies between classical and free probability . . . . .	20
References . . . . .	23
<b>2 Kolmogorov operators and SPDEs . . . . .</b>	29
<i>by M. Röckner</i>	
2.1 Fokker–Planck–Kolmogorov equations . . . . .	29
2.2 Three selected results on SPDEs . . . . .	40
References . . . . .	52
<b>3 Analysis and stochastic processes on metric measure spaces . . . . .</b>	55
<i>by A. Grigor'yan</i>	
3.1 Analysis on manifolds . . . . .	55
3.2 Analysis on metric measure spaces . . . . .	63
3.3 Homology theory on graphs . . . . .	68
References . . . . .	71
<b>4 Markov evolutions in spatial ecology: From microscopic dynamics to kinetics . . . . .</b>	75
<i>by Yu. Kondratiev, O. Kutovyi, P. Tkachov</i>	
4.1 Introduction . . . . .	75
4.2 Complex systems . . . . .	77
4.3 Markov evolutions . . . . .	81
4.4 Birth-and-death evolutions . . . . .	84
4.5 Vlasov-type scalings . . . . .	88
4.6 Kinetic equation . . . . .	92
References . . . . .	103

<b>5 Metastability in randomly perturbed dynamical systems: Beyond large-deviation theory</b>	107
<i>by B. Gentz</i>	
5.1 Large deviations . . . . .	107
5.2 Kramers' Law . . . . .	113
5.3 Parabolic SPDEs . . . . .	117
5.4 Unstable periodic orbits . . . . .	121
5.5 Mixed-mode oscillations . . . . .	125
References . . . . .	126
<b>6 Computation and stability of waves in equivariant evolution equations</b>	129
<i>by W.-J. Beyn, D. Otten</i>	
6.1 Equivariant evolution equations . . . . .	129
6.2 The freezing method . . . . .	133
6.3 Applications . . . . .	137
6.4 Relative Equilibria . . . . .	144
6.5 Nonlinear eigenvalue problems . . . . .	152
References . . . . .	156
<b>7 Initial value problems for nonlinear dispersive equations at critical regularity</b>	159
<i>by S. Herr</i>	
7.1 Introduction . . . . .	159
7.2 Nonlinear Schrödinger equations on compact manifolds . . . . .	165
7.3 Nonlinear systems on Euclidean space . . . . .	173
References . . . . .	179
<b>8 Variational solutions to nonlocal problems</b>	183
<i>by M. Käffmann</i>	
8.1 Introduction . . . . .	183
8.2 Variational solutions to the Dirichlet problem . . . . .	185
8.3 Ellipticity and coercivity of nonlocal operators . . . . .	189
8.4 (Weak) Harnack inequalities, and Hölder regularity . . . . .	191
References . . . . .	194
<b>9 Spectral and arithmetic structures in aperiodic order</b>	197
<i>by M. Baake, F. Gähler, C. Huck, P. Zeiner</i>	
9.1 Introduction . . . . .	197
9.2 Weak model sets . . . . .	198
9.3 A decorated quasiperiodic tiling with mixed spectrum . . . . .	203
9.4 Random inflations . . . . .	210
9.5 Enumeration of lattices . . . . .	213
References . . . . .	217

<b>10 Affine special Kähler structures in real dimension two . . . . .</b>	221
<i>by M. Callies, A. Haydys</i>	
10.1 Introduction . . . . .	221
10.2 Special Kähler geometry in local coordinates . . . . .	223
10.3 Some global aspects of special Kähler geometry on $\mathbb{P}^1$ . . . . .	230
References . . . . .	232
<b>11 Non-crossing partitions . . . . .</b>	235
<i>by B. Baumeister, K.-U. Bux, F. Götze, D. Kielak, H. Krause</i>	
11.1 The poset of non-crossing partitions . . . . .	235
11.2 Non-crossing partitions in free probability . . . . .	240
11.3 Braid groups . . . . .	247
11.4 Non-crossing partitions in Coxeter groups . . . . .	259
11.5 The Hurwitz action . . . . .	265
11.6 Non-crossing partitions arising in representation theory . . . . .	267
11.7 Generalised Cartan lattices . . . . .	269
11.8 Braid group actions on exceptional sequences . . . . .	270
References . . . . .	272
<b>12 The derived category of the projective line . . . . .</b>	275
<i>by H. Krause, G. Stevenson</i>	
12.1 Introduction . . . . .	275
12.2 Preliminaries . . . . .	276
12.3 Types of localisation . . . . .	279
12.4 Cohomological localisations for the projective line . . . . .	285
12.5 Exotic localisations . . . . .	292
References . . . . .	296
<b>13 Higher finiteness properties of braided groups . . . . .</b>	299
<i>by K.-U. Bux</i>	
13.1 Introduction: From group theory to topology . . . . .	299
13.2 Brown's criterion . . . . .	301
13.3 Combinatorial Morse theory . . . . .	303
13.4 Matching complexes for graphs and surfaces . . . . .	305
13.5 Higher generation in symmetric groups and braid groups . . . . .	308
13.6 The braided Thompson group $V^{\text{br}}$ . . . . .	310
13.7 A cube complex for $V^{\text{br}}$ . . . . .	312
13.8 The Morse function and its descending links . . . . .	314
13.9 Connectivity of descending links . . . . .	316
13.10 Finiteness properties of $V^{\text{br}}$ : Proof of Theorem 13.6.1 . . . . .	320
References . . . . .	320

<b>14 Zeta functions and the trace formula . . . . .</b>	323
<i>by W. Hoffmann</i>	
14.1 Introduction . . . . .	323
14.2 Zeta integrals . . . . .	324
14.3 The Trace formula . . . . .	334
14.4 Unipotent terms in the trace formula . . . . .	338
References . . . . .	342
<b>15 Zeta functions of groups and rings—functional equations and analytic uniformity . . . . .</b>	345
<i>by C. Voll</i>	
15.1 Zeta functions associated to groups and rings . . . . .	345
15.2 Submodule zeta functions . . . . .	347
15.3 Representation zeta functions for unipotent group schemes . . . . .	355
References . . . . .	361
<b>16 Conjectures of Brumer, Gross and Stark . . . . .</b>	365
<i>by A. Nickel</i>	
16.1 Preliminaries . . . . .	366
16.2 The abelian case . . . . .	368
16.3 The general case . . . . .	370
16.4 Relations to further conjectures and results . . . . .	379
References . . . . .	386
<b>17 Displays and <math>p</math>-divisible groups . . . . .</b>	389
<i>by T. Zink</i>	
17.1 Introduction . . . . .	389
17.2 Frames . . . . .	390
17.3 Displays . . . . .	393
17.4 Classification of $p$ -divisible groups . . . . .	397
17.5 The nilpotency condition . . . . .	398
17.6 Isogenies . . . . .	402
References . . . . .	407
List of contributors . . . . .	409
Index . . . . .	411
