Foreword v
Vincent Alberge and Athanase Papadopoulos

Introduction vii
Vincent Alberge and Athanase Papadopoulos

Prologue xxi
An excerpt from "Sur les hypothèses fondamentales de la géométrie"
Henri Poincaré (*translated by Athanase Papadopoulos*)

PART I. Spherical and hyperbolic geometries

Chapter 1
Area in non-Euclidean geometry 3
Norbert A'Campo and Athanase Papadopoulos

Chapter 2
The area formula for hyperbolic triangles 27
Elena Frenkel and Weixu Su

Chapter 3
On a problem of Schubert in hyperbolic geometry 47
Vincent Alberge and Elena Frenkel

Chapter 4
On a theorem of Lambert:
medians in spherical and hyperbolic geometries 57
Himalaya Senapati

Chapter 5
Inscribing a triangle in a circle in spherical geometry 67
Himalaya Senapati

Chapter 6
Monotonicity in spherical and hyperbolic triangles 81
Himalaya Senapati

Chapter 7
De Tilly's mechanical view on hyperbolic and spherical geometries 93
Dmitriy Slutskiy

Chapter 8
The Gauss–Bonnet theorem and the geometry of surfaces 113
Son Lam Ho

Chapter 9
On the non-existence of a perfect map from the 2-sphere to the Euclidean plane 125
Charalampos Charitos and Ioannis Papadoperakis

Chapter 10
Area preserving maps from the sphere to the Euclidean plane 135
Charalampos Charitos

Chapter 11
Area and volume in non-Euclidean geometry 151
Nikolay Abrosimov and Alexander Mednykh

Chapter 12
Statics and kinematics of frameworks in Euclidean and non-Euclidean geometry 191
Ivan Izmestiev

PART II. Projective geometries

Chapter 13
Contributions to non-Euclidean geometry I 237
Eduard Study (*translated by Annette A'Campo-Neuen*)

Chapter 14
Notes on Eduard Study's paper "Contributions to non-Euclidean geometry I" 253
Annette A'Campo-Neuen and Athanase Papadopoulos

Chapter 15
Spherical and hyperbolic conics 263
Ivan Izmestiev

Chapter 16
Spherical, hyperbolic, and other projective geometries: convexity, duality, transitions 321
François Fillastre and Andrea Seppi

Part III. Projective geometries

Chapter 17
Hermitian trigonometry 413
Boumediene Et-Taoui

Chapter 18
A theorem on equiareal triangles with a fixed base 427
Victor Pambuccian

List of contributors 439
