

# Contents

<b>Preface</b>	v
<i>Jaroslav Dittrich, Hynek Kovařík, and Ari Laptev</i>	
<b>Relative partition function of Coulomb plus delta interaction</b>	1
<i>Sergio Albeverio, Claudio Cacciapuoti, and Mauro Spreafico</i>	
<b>Inequivalence of quantum Dirac fields of different masses and the underlying general structures involved</b>	31
<i>Asao Arai</i>	
<b>On a class of Schrödinger operators exhibiting spectral transition</b>	55
<i>Diana Barseghyan and Olga Rossi</i>	
<b>On the quantum mechanical three-body problem with zero-range interactions</b>	71
<i>Giulia Basti and Alessandro Teta</i>	
<b>On the index of meromorphic operator-valued functions and some applications</b>	95
<i>Jussi Behrndt, Fritz Gesztesy, Helge Holden, and Roger Nichols</i>	
<b>Trace formulae for Schrödinger operators with singular interactions</b>	129
<i>Jussi Behrndt, Matthias Langer, and Vladimir Lotoreichik</i>	
<b>An improved bound for the non-existence of radial solutions of the Brezis–Nirenberg problem in <math>\mathbb{H}^n</math></b>	153
<i>Rafael D. Benguria and Soledad Benguria</i>	
<b>Twisted waveguide with a Neumann window</b>	161
<i>Philippe Briet and Hiba Hammedi</i>	
<b>Example of a periodic Neumann waveguide with a gap in its spectrum</b>	177
<i>Giuseppe Cardone and Andrii Khrabustovskyi</i>	
<b>Two-dimensional time-dependent point interactions</b>	189
<i>Raffaele Carlone, Michele Correggi, and Rodolfo Figari</i>	

<b>On resonant spectral gaps in quantum graphs</b>	213
<i>Ngoc T. Do, Peter Kuchment, and Beng Ong</i>	
<b>Adiabatic theorem for a class of stochastic differential equations on a Hilbert space</b>	223
<i>Martin Fraas</i>	
<b>Eigenvalues of Schrödinger operators with complex surface potentials</b>	245
<i>Rupert L. Frank</i>	
<b>A lower bound to the spectral threshold in curved quantum layers</b>	261
<i>Pedro Freitas and David Krejčířík</i>	
<b>To the spectral theory of vector-valued Sturm–Liouville operators with summable potentials and point interactions</b>	271
<i>Yaroslav Granovskyi, Mark Malamud, Hagen Neidhardt, and Andrea Posilicano</i>	
<b>Spectral asymptotics for the Dirichlet Laplacian with a Neumann window via a Birman–Schwinger analysis of the Dirichlet-to-Neumann operator</b>	315
<i>André Hänel and Timo Weidl</i>	
<b>Dirichlet eigenfunctions in the cube, sharpening the Courant nodal inequality</b>	353
<i>Bernard Helffer and Rola Kiwan</i>	
<b>A mathematical modeling of electron–phonon interaction for small wave numbers close to zero</b>	373
<i>Masao Hirokawa</i>	
<b>The modified unitary Trotter–Kato and Zeno product formulas revisited</b>	401
<i>Takashi Ichinose</i>	
<b>Spectral asymptotics induced by approaching and diverging planar circles</b>	419
<i>Sylwia Kondej</i>	
<b>Spectral estimates for the Heisenberg Laplacian on cylinders</b>	433
<i>Hynek Kovařík, Bartosch Ruzskowski, and Timo Weidl</i>	

Contents	XIII
<b>Variational proof of the existence of eigenvalues for star graphs</b> <i>Konstantin Pankrashkin</i>	447
<b>On the boundedness and compactness of weighted Green operators of second-order elliptic operators</b> <i>Yehuda Pinchover</i>	459
<b>Abstract graph-like spaces and vector-valued metric graphs</b> <i>Olaf Post</i>	491
<b>A Cayley–Hamilton theorem for periodic finite band matrices</b> <i>Barry Simon</i>	525
<b>Path topology dependence of adiabatic time evolution</b> <i>Atushi Tanaka and Taksu Cheon</i>	531
<b>On quantum graph filters with flat passbands</b> <i>Ondřej Turek</i>	543
<b>Comments on the Chernoff <math>\sqrt{n}</math>-lemma</b> <i>Valentin A. Zagrebnov</i>	565
List of contributors	575
