Preface		vii
A. Alldridge	Symmetric superspaces: Slices, radial parts, and invariant functions	1
G. Cerulli Irelli	Geometry of quiver Grassmannians of Dynkin type with applications to cluster algebras	13
S. Cupit-Foutou	Spherical varieties and perspectives in representation theory	47
O. Dudas, M. Varagnolo, E. Vasserot	Categorical actions from Lusztig induction and restriction on finite general linear groups	59
W. Ebeling	Homological mirror symmetry for singularities	75
M. Ehrig, C. Stroppel	On the category of finite-dimensional representations of $\mathrm{OSp}(r 2n)$: Part I	109
B. Elias, N. Snyder, G. Williamson	On cubes of Frobenius Extensions	171
X. Fang, G. Fourier, P. Littelmann	On toric degenerations of flag varieties	187
P. Fiebig	Subquotient categories of the affine category \mathcal{O} at the critical level	233
J. Fuchs, C. Schweigert	Low-dimensional topology, low-dimensional field theory and representation theory	255
M. Kalck	Derived categories of quasi-hereditary algebras and their derived composition series	269
S. Koenig	Dominant dimension and applications	309
H. Krause	Highest weight categories and strict polynomial functors. With an appendix by C. Aquilino	331
J. Külshammer	In the bocs seat: Quasi-hereditary algebras and representation type	375
S. Ladkani	From groups to clusters	427

M. Lanini	Semi-infinite combinatorics in representation theory	501
G. Malle	Local-global conjectures in the representation theory of finite groups	519
K.-H. Neeb	Bounded and semibounded representations of infinite dimensional Lie groups	541
I. Penkov, A. Petukhov	On ideals in $U(\mathfrak{sl}(\infty))$, $U(\mathfrak{o}(\infty))$, $U(\mathfrak{sp}(\infty))$	565
G. Pezzini	Spherical varieties: applications and generalizations	603
M. Reineke	Quiver moduli and small desingularizations of some GIT quotients	613
H. Seppänen, V. V. Tsanov	Geometric invariant theory for principal three-dimensional subgroups acting on flag varieties	637
B. Späth	Inductive conditions for counting conjectures via character triples	665
U. Thiel	Restricted rational Cherednik algebras	681
C. Zellner	On the existence of regular vectors	747
