

# Contents

Preface .....	vii
The influence of Oscar Zariski on algebraic geometry <i>by Piotr Blass</i> .....	1
The geometry of $T$ -varieties <i>by Klaus Altmann, Nathan Owen Ilten, Lars Petersen, Hendrik Süß, and Robert Vollmert</i> .....	17
Introduction to equivariant cohomology in algebraic geometry <i>by Dave Anderson</i> .....	71
Recent developments and open problems in linear series <i>by Thomas Bauer, Cristiano Bocci, Susan Cooper, Sandra Di Rocco, Marcin Dumnicki, Brian Harbourne, Kelly Jabbusch, Andreas L. Knutsen, Alex Küronya, Rick Miranda, Joaquim Roé, Hal Schenck, Tomasz Szemberg, and Zach Teitler</i> .....	93
Moduli of map germs, Thom polynomials and the Green–Griffiths conjecture <i>by Gergely Bérczi</i> .....	141
The Minimal Model Program revisited <i>by Paolo Cascini and Vladimir Lazić</i> .....	169
Invariants of hypersurfaces and logarithmic differential forms <i>by Stawomir Cynk and Stawomir Rams</i> .....	189
Prym varieties and their moduli <i>by Gavril Farkas</i> .....	215
On generalized Wrońskians <i>by Letterio Gatto and Inna Scherbak</i> .....	257
Lines crossing a tetrahedron and the Bloch group <i>by Kevin Hutchinson and Masha Vlasenko</i> .....	297

On complex and symplectic toric stacks <i>by Andreas Hochenegger and Frederik Witt</i> .....	305
Deformation along subsheaves, II <i>by Clemens Jörder and Stefan Kebekus</i> .....	333
Some degenerations of $G_2$ and Calabi–Yau varieties <i>by Michał Kapustka</i> .....	359
Notes on Kebekus’ lectures on differential forms on singular spaces <i>by Mateusz Michałek</i> .....	375
Lecture notes on K3 and Enriques surfaces <i>by Shigeru Mukai</i> .....	389
IMPANGA lecture notes on log canonical thresholds <i>by Mircea Mustață</i> .....	407
On Schur function expansions of Thom polynomials <i>by Özer Öztürk and Piotr Pragacz</i> .....	443
A note on the kernel of the norm map <i>by Marek Szyjewski</i> .....	481
Seshadri and packing constants <i>by Halszka Tutaj-Gasińska</i> .....	489
List of Contributors .....	501
