

# Contents

Preface .....	v
<i>Norbert A'Campo and Athanase Papadopoulos</i>	
Notes on non-Euclidean geometry .....	1
<i>Françoise Dal'Bo</i>	
Crossroads between hyperbolic geometry and number theory .....	183
<i>Frank Herrlich</i>	
Introduction to origamis in Teichmüller space .....	233
<i>Philipp Korablev and Sergey Matveev</i>	
Five lectures on 3-manifold topology .....	255
<i>Gabriele Link</i>	
An introduction to globally symmetric spaces .....	285
<i>Julien Marché</i>	
Geometry of the representation spaces in $SU(2)$ .....	333
<i>Carlo Petronio</i>	
Algorithmic construction and recognition of hyperbolic 3-manifolds, links, and graphs .....	371
<i>Viktor Schroeder</i>	
An introduction to asymptotic geometry .....	405
