

# Table of Contents

Preface .....	v
<i>Michel Planat</i>	
The phase of oscillations and prime numbers: classical and quantum .....	1
<i>Jean-Louis Verger-Gaugry</i>	
On self-similar finitely generated uniformly discrete (SFU-)sets and sphere packings .....	39
<i>Jean-Pierre Gazeau, Zuzana Masáková, and Edita Pelantová</i>	
Nested quasicrystalline discretisations of the line .....	79
<i>Christoph Bergbauer and Dirk Kreimer</i>	
Hopf algebras in renormalization theory: locality and Dyson–Schwinger equations from Hochschild cohomology .....	133
<i>Emmanuel Royer</i>	
Fonction $\zeta$ et matrices aléatoires .....	165
<i>Philippe Michel</i>	
Some recent applications of Kloostermania .....	225
<i>Ariane Mézard</i>	
Introduction à la correspondance de Langlands locale .....	253
