

## Table of Contents

Preface.....	v
<i>Yulij Ilyashenko</i>	
Realization of irreducible monodromy by Fuchsian systems and reduction to the Birkhoff standard form (by Andrey Bolibruek) .....	1
<i>Claude Sabbah</i>	
The work of Andrey Bolibruek on isomonodromic deformations .....	9
<i>Michèle Audin</i>	
Two notions of integrability .....	27
<i>Werner Balser</i>	
Formal power series solutions of the heat equation in one spatial variable .....	49
<i>Prakash Belkale, Evgeny Mukhin and Alexander Varchenko</i>	
Multiplicity of critical points of master functions and Schubert calculus .....	59
<i>Philip Boalch</i>	
Some explicit solutions to the Riemann–Hilbert problem.....	85
<i>Phyllis J. Cassidy and Michael F. Singer</i>	
Galois theory of parameterized differential equations and linear differential algebraic groups .....	113
<i>Boris Dubrovin and Marta Mazzocco</i>	
On the reductions and classical solutions of the Schlesinger equations .....	157
<i>Valentina A. Golubeva</i>	
On the Riemann–Hilbert correspondence for generalized Knizhnik–Zamolodchikov equations for different root systems .....	189

<i>Vladimir Petrov Kostov</i>	
Monodromy groups of regular systems on the Riemann sphere .....	209
<i>Vladimir P. Leksin</i>	
Monodromy of Cherednik–Kohno–Veselov connections .....	255
<i>Hiroshi Umemura</i>	
Invitation to Galois theory .....	269
List of Participants .....	291
