Preface	v
Introduction	ix
Program list of speakers and topics	xiii
Categorical aspects of bivariant K-theory	
<i>Ralf Meyer</i>	1
Inheritance of isomorphism conjectures under colimits	
<i>Arthur Bartels, Siegfried Echterhoff, and Wolfgang Lück</i>	41
Coarse and equivariant co-assembly maps	
<i>Heath Emerson and Ralf Meyer</i>	71
On K_1 of a Waldhausen category	
<i>Fernando Muro and Andrew Tonks</i>	91
Twisted K -theory – old and new	
<i>Max Karoubi</i>	117
Equivariant cyclic homology for quantum groups	
<i>Christian Voigt</i>	151
A Schwartz type algebra for the tangent groupoid	
<i>Paulo Carrillo Rouse</i>	181
C^* -algebras associated with the $ax + b$ -semigroup over \mathbb{N}	
<i>Joachim Cuntz</i>	201
On a class of Hilbert C^* -manifolds	
<i>Wend Werner</i>	217
Duality for topological abelian group stacks and T -duality	
<i>Ulrich Bunke, Thomas Schick, Markus Spitzweck, and Andreas Thom</i>	227

Deformations of gerbes on smooth manifolds <i>Paul Bressler, Alexander Gorokhovsky, Ryszard Nest, and Boris Tsygan</i>	349
Torsion classes of finite type and spectra <i>Grigory Garkusha and Mike Prest</i>	393
Parshin's conjecture revisited <i>Thomas Geisser</i>	413
Axioms for the norm residue isomorphism <i>Charles Weibel</i>	427
List of contributors	437
List of participants	439
