Foreword.....	v
Introduction to Teichmüller theory, old and new, II <i>by Athanase Papadopoulos</i> .....	1
<b>Part A. The metric and the analytic theory, 2</b>	
Chapter 1. The Weil-Petersson metric geometry <i>by Scott A. Wolpert</i> .....	47
Chapter 2. Infinite dimensional Teichmüller spaces <i>by Alastair Fletcher and Vladimir Markovic</i> .....	65
Chapter 3. A construction of holomorphic families of Riemann surfaces over the punctured disk with given monodromy <i>by Yoichi Imayoshi</i> .....	93
Chapter 4. The uniformization problem <i>by Robert Silhol</i> .....	131
Chapter 5. Riemann surfaces, ribbon graphs and combinatorial classes <i>by Gabriele Mondello</i> .....	151
Chapter 6. Canonical 2-forms on the moduli space of Riemann surfaces <i>by Nariya Kawazumi</i> .....	217
<b>Part B. The group theory, 2</b>	
Chapter 7. Quasi-homomorphisms on mapping class groups <i>by Koji Fujiwara</i> .....	241
Chapter 8. Lefschetz fibrations on 4-manifolds <i>by Mustafa Korkmaz and András I. Stipsicz</i> .....	271

Chapter 9. Introduction to measurable rigidity of mapping class groups <i>by Yoshikata Kida</i> .....	297
Chapter 10. Affine groups of flat surfaces <i>by Martin Möller</i> .....	369
Chapter 11. Braid groups and Artin groups <i>by Luis Paris</i> .....	389
<b>Part C. Representation spaces and geometric structures, 1</b>	
Chapter 12. Complex projective structures <i>by David Dumas</i> .....	455
Chapter 13. Circle packing and Teichmüller space <i>by Sadayoshi Kojima</i> .....	509
Chapter 14. $(2 + 1)$ Einstein spacetimes of finite type <i>by Riccardo Benedetti and Francesco Bonsante</i> .....	533
Chapter 15. Trace coordinates on Fricke spaces of some simple hyperbolic surfaces <i>by William M. Goldman</i> .....	611
Chapter 16. Spin networks and $SL(2, \mathbb{C})$ -character varieties <i>by Sean Lawton and Elisha Peterson</i> .....	685
<b>Part D. The Grothendieck–Teichmüller theory</b>	
Chapter 17. Grothendieck’s reconstruction principle and 2-dimensional topology and geometry <i>by Feng Luo</i> .....	733
Chapter 18. Dessins d’enfants and origami curves <i>by Frank Herrlich and Gabriela Schmithüsen</i> .....	767

Chapter 19. The Teichmüller theory of the solenoid <i>by Dragomir Šarić</i> .....	811
List of Contributors .....	857
Index .....	859
