|---|-----------|
| Preface | vii |
| Part I Introduction | 1 |
| 1 Introductions | 3 |
| 1.1 An abstract for experts | 3 |
| 1.2 A slow informal introduction for beginners | 5 |
| 1.3 A quicker introduction | 28 |
| 1.4 Book organization | 35 |
| 1.5 Book genesis | 37 |
| 1.6 Some open questions | 38 |
| 2 More on manifolds and on the linking number | 41 |
| 2.1 More background material on manifolds | 41 |
| 2.2 On the linking number, again | 48 |
| 3 Propagators | 53 |
| 3.1 Blowing up in real differential topology | 53 |
| 3.2 The configuration space $C_2(R)$ | 57 |
| 3.3 On propagators | 61 |
| 4 The Theta invariant | 65 |
| 4.1 The Θ -invariant of (R, τ) | 65 |
| 4.2 Parallelizations of 3-manifolds and Pontrjagin classes | 67 |
| 4.3 Defining a \mathbb{Q} -sphere invariant from Θ | 69 |
| 5 Parallelizations of 3-manifolds and Pontrjagin classes | 75 |
| 5.1 $[(M, \partial M), (\text{SO}(3), 1)]$ is an abelian group | 75 |
| 5.2 Any oriented 3-manifold is parallelizable | 77 |
| 5.3 The homomorphism induced by the degree | 80 |
| 5.4 On the groups $\text{SU}(n)$ | 83 |
| 5.5 Definition of relative Pontrjagin numbers | 84 |
| 5.6 On the groups $\text{SO}(3)$ and $\text{SO}(4)$ | 87 |
| 5.7 Relating the Pontrjagin number to the degree | 91 |

5.8 Properties of Pontrjagin numbers 93
 5.9 More on $[(M, \partial M), (\text{SO}(3), 1)]$ 97

Part II The general invariants 101

6 Introduction to finite type invariants and Jacobi diagrams 103
 6.1 Definition of finite type invariants 103
 6.2 Introduction to chord diagrams 106
 6.3 More spaces of diagrams 112
 6.4 Multiplying diagrams 117
 6.5 Coproduct on $\mathcal{A}(\mathcal{L})$ 123
 6.6 Bialgebra structures 124

7 First definitions of Z 131
 7.1 Configuration spaces of Jacobi diagrams in 3-manifolds 131
 7.2 Configuration space integrals 133
 7.3 Configuration space integrals associated to a chord 138
 7.4 First definition of Z 139
 7.5 Straight links 148
 7.6 Second definition of Z 151

8 Compactifications of configuration spaces 153
 8.1 An informal introduction 153
 8.2 General presentation of $C_V(R)$ 160
 8.3 Configuration spaces associated to unit normal bundles to diagonals 161
 8.4 The codimension-one faces of $C(R, L; \Gamma)$ 164
 8.5 Detailed study of $\mathcal{S}_V(T)$ 168
 8.6 Blowing up diagonals 176
 8.7 Blowing up ∞ 179
 8.8 Finishing the proofs of the statements of Sections 8.2 and 8.4 182
 8.9 Alternative descriptions of configuration spaces 183

9 Dependence on the propagating forms 185
 9.1 Introduction 185
 9.2 Sketch of proof of Proposition 9.2 191
 9.3 Cancellations of nondegenerate faces 194

| | | |
|-------------------------------|---|------------|
| 10 | First properties of Z and anomalies | 205 |
| 10.1 | Some properties of $Z(\check{R}, L, \tau)$ | 205 |
| 10.2 | On the anomaly β | 207 |
| 10.3 | On the anomaly α | 210 |
| 10.4 | Dependence on the forms for straight links | 212 |
| 10.5 | The general variation for homogeneous propagating forms | 215 |
| 10.6 | Some more properties of Z | 222 |
| 11 | Rationality | 225 |
| 11.1 | From integrals to algebraic intersections | 225 |
| 11.2 | More on general propagating chains | 229 |
| 11.3 | Existence of transverse propagating chains | 232 |
| 11.4 | More on forms dual to transverse propagating chains | 239 |
| 11.5 | A discrete definition of the anomaly β | 242 |
| Part III Functoriality | | 245 |
| 12 | A first introduction to the functor Z^f | 249 |
| 12.1 | Extension of Z to long tangles | 249 |
| 12.2 | Definition of Z^f for framed tangles | 255 |
| 12.3 | Defining Z^f for combinatorial q -tangles | 258 |
| 12.4 | Good monoidal functors for combinatorial q -tangles | 262 |
| 13 | More on the functor Z^f | 267 |
| 13.1 | Tangles and q -tangles | 267 |
| 13.2 | Definition of Z^f for all q -tangles | 274 |
| 13.3 | Properties of the functor Z^f | 277 |
| 14 | Invariance of Z^f for long tangles | 285 |
| 14.1 | Singular models associated to trees | 285 |
| 14.2 | Configuration spaces of graphs on long tangles | 298 |
| 14.3 | Variations of integrals on configuration spaces of long tangles | 319 |
| 15 | The invariant Z as a holonomy for braids | 323 |
| 15.1 | On the structure of $\mathcal{V}(\Gamma)$ | 323 |
| 15.2 | A one-form on $\check{S}_B(\mathbb{C})$ | 340 |

| | | |
|----------------|--|------------|
| 16 | Discretizable variants of \mathcal{Z}^f and extensions to q-tangles | 353 |
| 16.1 | Discretizable holonomies | 353 |
| 16.2 | Variants of \mathcal{Z}^f for tangles | 359 |
| 16.3 | Straight tangles | 361 |
| 16.4 | Semi-algebraic structures on some configuration spaces | 369 |
| 16.5 | Extending \mathcal{Z}^f to q -tangles | 373 |
| 17 | Justifying the properties of \mathcal{Z}^f | 389 |
| 17.1 | Transversality and rationality | 390 |
| 17.2 | Functoriality | 396 |
| 17.3 | Insertion of a tangle in a trivial q -braid | 402 |
| 17.4 | Duplication property | 404 |
| 17.5 | Behavior of \mathcal{Z}^f with respect to the coproduct | 418 |
| 17.6 | A proof of universality | 420 |
| Part IV | Universality | 427 |
| 18 | The main universality statements and their corollaries | 429 |
| 18.1 | Universality with respect to Lagrangian-preserving surgeries | 429 |
| 18.2 | On Dehn surgeries | 432 |
| 18.3 | Direct proof of a surgery formula for Θ | 436 |
| 18.4 | Finite type invariants of \mathbb{Z} -spheres | 443 |
| 18.5 | Finite type invariants of \mathbb{Q} -spheres | 447 |
| 18.6 | Identifying Θ with the Casson–Walker invariant | 451 |
| 18.7 | Sketch of the proof of Theorem 18.6 | 451 |
| 18.8 | Mixed universality statements | 459 |
| 19 | More flexible definitions of \mathcal{Z} using pseudo-parallelizations | 471 |
| 19.1 | Why we need pseudo-parallelizations | 471 |
| 19.2 | Definition of pseudo-parallelizations | 475 |
| 19.3 | Integration of homogeneous propagating forms along surfaces | 480 |
| 19.4 | Anomalous terms for pseudo-parallelizations | 483 |
| 19.5 | Proof of Theorem 19.17 | 495 |
| 20 | Simultaneous normalization of propagating forms | 501 |
| 20.1 | Sketch | 501 |
| 20.2 | Proof of Proposition 20.1 | 504 |
| 20.3 | Proof of Lemma 20.2 | 509 |

21 Much more flexible definitions of \mathcal{Z} 519

 21.1 More propagating forms associated to pseudo-parallelizations 519

 21.2 Pseudo-sections associated with pseudo-parallelizations 525

 21.3 Definition of \mathcal{Z} with respect to pseudo-sections 530

A Some basic algebraic topology 535

 A.1 Homology 535

 A.2 Homotopy groups 544

B Differential forms and de Rham cohomology 547

 B.1 Differential forms 547

 B.2 De Rham cohomology 549

Terminology 555

Index of notation 559

Summarizing the main definitions of Z 563

References 565
