Preface	vii
<b>Introduction: Some historical markers</b>	1
The work of Hadamard . . . . .	1
The works of Menger and Wald . . . . .	4
The works of Busemann and Alexandrov . . . . .	6
Convexity . . . . .	8
<b>1 Lengths of paths in metric spaces</b>	10
1.1 The length of a path . . . . .	11
1.2 Arclength as parameter . . . . .	19
1.3 Differentiable paths in Euclidean space . . . . .	22
1.4 The space of paths . . . . .	24
Notes on Chapter 1 . . . . .	31
<b>2 Length spaces and geodesic spaces</b>	34
2.1 Length spaces . . . . .	35
2.2 Geodesics . . . . .	50
2.3 Limits of geodesics . . . . .	56
2.4 Geodesic spaces . . . . .	58
2.5 Geodesic convexity . . . . .	67
2.6 Menger convexity . . . . .	69
Notes on Chapter 2 . . . . .	77
<b>3 Maps between metric spaces</b>	79
3.1 $K$ -Lipschitz maps and $K$ -length-non-increasing maps . . . . .	80
3.2 Non-expanding maps . . . . .	82
3.3 Distance non-decreasing maps . . . . .	87
3.4 Local isometries . . . . .	89
3.5 Covering spaces . . . . .	96
Notes on Chapter 3 . . . . .	101
<b>4 Distances</b>	103
4.1 The Hausdorff distance . . . . .	105
4.2 The Busemann–Hausdorff distance . . . . .	110
4.3 Closed limits of subsets . . . . .	112
4.4 Metrics on the isometry group . . . . .	119
Notes on Chapter 4 . . . . .	124

<b>5 Convexity in vector spaces</b>	127
5.1 Affinely convex subsets . . . . .	127
5.2 Convex hull . . . . .	133
5.3 Convexity in normed vector spaces . . . . .	137
5.4 Limits of convex sets . . . . .	143
5.5 Minkowski's construction . . . . .	144
5.6 The Hilbert geometry . . . . .	148
Notes on Chapter 5 . . . . .	156
<b>6 Convex functions</b>	159
6.1 Convex functions . . . . .	160
6.2 Convex functions of one variable . . . . .	170
Notes on Chapter 6 . . . . .	175
<b>7 Strictly convex normed vector spaces</b>	178
7.1 Strictly convex normed vector spaces . . . . .	178
7.2 Uniquely geodesic spaces . . . . .	180
7.3 Inner products and $\ell^p$ norms . . . . .	185
Notes on Chapter 7 . . . . .	186
<b>8 Busemann spaces</b>	187
8.1 Busemann spaces . . . . .	187
8.2 Local geodesics in Busemann spaces . . . . .	196
8.3 Geodesic convexity in Busemann spaces . . . . .	198
8.4 Convex functions on Busemann spaces . . . . .	199
Notes on Chapter 8 . . . . .	204
<b>9 Locally convex spaces</b>	210
9.1 Locally convex spaces . . . . .	211
9.2 Variation of local geodesics . . . . .	218
9.3 The universal covering of a locally convex metric space . . . . .	224
Notes on Chapter 9 . . . . .	227
<b>10 Asymptotic rays and the visual boundary</b>	229
10.1 Asymptotic rays . . . . .	230
10.2 The visual boundary . . . . .	235
Notes on Chapter 10 . . . . .	239
<b>11 Isometries</b>	241
11.1 Minimal displacement, minimal sets and the isometry types . . . . .	242
11.2 Axial isometries . . . . .	249
11.3 Periodic geodesics . . . . .	253
11.4 Axial isometries of Busemann spaces . . . . .	256

11.5 Parallel lines . . . . .	258
Notes on Chapter 11 . . . . .	260
<b>12 Busemann functions, co-rays and horospheres</b>	<b>261</b>
12.1 Busemann functions . . . . .	261
12.2 Co-rays . . . . .	265
12.3 Horospheres . . . . .	269
Notes on Chapter 12 . . . . .	273
References	275
Index	283
