

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Motivation	1
1.2	Foundations of almost mathematics (Chapters 2–5)	3
1.3	$\mathcal{O}^+/p$ , $\mathcal{O}^+$ , and $\mathcal{O}$ -vector bundles (Chapter 6)	9
1.4	$p$ -adic nearby cycles sheaves (Chapter 7)	10
1.5	Notation	15
<b>2</b>	<b>Almost commutative algebra</b>	17
2.1	The category of almost modules	17
2.2	Basic functors on categories of almost modules	23
2.3	Derived category of almost modules	26
2.4	Basic functors on derived categories of almost modules	29
2.5	Almost finitely generated and almost finitely presented modules	35
2.6	Almost coherent modules and almost coherent rings	46
2.7	Almost noetherian rings	55
2.8	Base change for almost modules	57
2.9	Almost faithfully flat algebras	61
2.10	Almost faithfully flat descent	65
2.11	(Topologically) Finite type $K^+$ -algebras	69
2.12	Almost finitely generated modules over adhesive rings	71
2.13	Modules over topologically finite type $K^+$ -algebras	74
<b>3</b>	<b>Almost mathematics on ringed sites</b>	77
3.1	The category of $\mathcal{O}_X^a$ -modules	77
3.2	Basic functors on categories of $\mathcal{O}_X^a$ -modules	82
3.3	Digression: The projection formula	91
3.4	Derived category of $\mathcal{O}_X^a$ -modules	95
3.5	Basic functors on derived categories of $\mathcal{O}_X^a$ -modules	96
<b>4</b>	<b>Almost coherent sheaves on schemes and formal schemes</b>	105
4.1	Schemes. The category of almost coherent $\mathcal{O}_X^a$ -modules	105
4.2	Schemes. Basic functors on almost coherent $\mathcal{O}_X^a$ -modules	110
4.3	Schemes. Approximation of almost finitely presented $\mathcal{O}_X^a$ -modules	114
4.4	Schemes. Derived category of almost coherent $\mathcal{O}_X^a$ -modules	117
4.5	Formal schemes. The category of almost coherent $\mathcal{O}_{\mathfrak{X}}^a$ -modules	123
4.6	Formal schemes. Basic functors on almost coherent $\mathcal{O}_{\mathfrak{X}}^a$ -modules	132

4.7	Formal schemes. Approximation of almost coherent $\mathcal{O}_X^a$ -modules . . .	136
4.8	Formal schemes. Derived category of almost coherent $\mathcal{O}_X^a$ -modules . .	140
4.9	Formal schemes. Basic functors on derived categories of $\mathcal{O}_X^a$ -modules	145
<b>5</b>	<b>Cohomological properties of almost coherent sheaves</b> . . . . .	151
5.1	Almost proper mapping theorem . . . . .	151
5.2	Characterization of quasi-coherent, almost coherent complexes . . . .	156
5.3	The GAGA theorem . . . . .	159
5.4	The formal function theorem . . . . .	165
5.5	Almost version of Grothendieck duality . . . . .	169
<b>6</b>	<b><math>\mathcal{O}^+/p</math>-modules</b> . . . . .	173
6.1	Recollection: The $v$ -topology . . . . .	173
6.2	Recollection: The quasi-proétale topology . . . . .	178
6.3	Integral structure sheaves . . . . .	183
6.4	$v$ -descent for étale cohomology of $\mathcal{O}^+/p$ . . . . .	187
6.5	$\mathcal{O}^+/p$ -vector bundles in different topologies . . . . .	197
6.6	Trivializing $\mathcal{O}^+/p$ -vector bundles . . . . .	202
6.7	Étale coefficients . . . . .	207
6.8	Application: $\mathcal{O}^+$ and $\mathcal{O}$ vector bundles . . . . .	209
<b>7</b>	<b>Almost coherence of “<math>p</math>-adic nearby cycles”</b> . . . . .	217
7.1	Introduction . . . . .	217
7.2	Digression: Geometric points . . . . .	222
7.3	Applications . . . . .	225
7.4	Perfectoid covers of affinoids . . . . .	231
7.5	Strictly totally disconnected covers of affinoids . . . . .	236
7.6	Perfectoid torsors . . . . .	239
7.7	Nearby cycles are quasi-coherent . . . . .	243
7.8	Nearby cycles are almost coherent for smooth $X$ and small $\mathcal{E}$ . . . . .	245
7.9	Nearby cycles are almost coherent for general $X$ and $\mathcal{E}$ . . . . .	254
7.10	Cohomological bound on nearby cycles . . . . .	256
7.11	Proof of Theorem 7.1.2 . . . . .	258
7.12	Proof of Theorem 7.1.9 . . . . .	259
7.13	Proof of Theorem 7.1.11 . . . . .	264
<b>A</b>	<b>Derived complete modules</b> . . . . .	269
<b>B</b>	<b>Perfectoid rings</b> . . . . .	273
