Mathematics Subject Classification 2020: 35-06 (primary); 35B27, 35B32, 35B36, 35B65, 35J87, 35K10, 35K58, 35R11, 35R35, 35R37, 49J20, 53A04, 76B25 (secondary).

Keywords: free boundary, transmission problem, solitary waves, bifurcations, parabolic equations, Morrey coefficients, mesoscopic, biological networks, gradient flows, stationary states, quasilinear elliptic equations, p -Laplacian, local solutions, Lorentz spaces, Orlicz spaces, prescribed curvature, Hardy inequality, nonlocal free boundary problem, obstacle problem, heat equation, Stefan problem, nonlocal convolution type operators, periodic homogenization, operator estimates, corrector, Riesz fractional gradient, two-phase obstacle type problem, fractional p -Laplacian, quasivariational inequalities, singular minimizers, double phase, variable exponent, Lotka–Volterra competition model, instability, Gamma-convergence, Dirichlet-area energy

ISBN 978-3-98547-094-5, eISBN 978-3-98547-594-0, DOI 10.4171/NNU90
