Preface	v
1 Statement of results	1
1.1 Multiple cuts	1
1.2 Neck-stretching	4
1.3 Broken maps	7
1.4 Broken Fukaya algebras	13
1.5 Unobstructedness, disk potentials, and cohomology	16
1.6 Almost toric manifolds and toric degenerations	18
2 Applications to disk counting	23
2.1 Counting disks in the second Hirzebruch surface	24
2.2 Counting disks in cubic surfaces	28
2.3 Counting disks in flag varieties	41
2.4 Counting curves in the plane	55
3 Broken manifolds	63
3.1 Symplectic cut	64
3.2 Multiple cuts in a symplectic manifold	66
3.3 Symplectic broken manifolds	72
3.4 Neck-stretched almost complex structures	81
3.5 Broken manifold as a degenerate limit	88
3.6 Translations: Relating neck-stretched and broken manifolds	98
3.7 Existence of symplectic cylindrical structures	100
4 Broken disks	103
4.1 Treed disks	104
4.2 Treed pseudoholomorphic disks	111
4.3 Multiply-broken disks	112
4.4 Symmetries of broken maps	125
5 Stabilizing divisors	133
5.1 Stabilizing divisors in symplectic manifolds	133
5.2 Cylindrical almost complex structures, without gluability	136
5.3 Stabilizing divisors in broken manifolds	140
5.4 Stabilizing pairs in neck-stretched manifolds	149

6	Coherent perturbations and regularity	155
6.1	Domain-dependent perturbations	156
6.2	Perturbed maps	161
6.3	Fredholm theory for broken maps	165
6.4	The index of a broken map	171
6.5	Transversality	179
6.6	The toric case	187
7	Hofer energy and exponential decay	191
7.1	Symplectic forms on neck-stretched manifolds	193
7.2	Squashing maps	200
7.3	Multi-directional Hofer energy	206
7.4	Removal of singularities	218
7.5	Hofer energy for Gromov compactness of broken maps	228
8	Gromov compactness	231
8.1	Gromov convergence	234
8.2	Horizontal convergence	240
8.3	Breaking annuli	242
8.4	Proof of convergence for breaking maps	252
8.5	Convergence for broken maps	260
8.6	Boundaries of rigid strata	272
9	Gluing	277
9.1	The approximate solution	278
9.2	Fredholm theory for glued maps	280
9.3	Error estimate	284
9.4	Uniform right inverse	286
9.5	Uniform quadratic estimate	290
9.6	Picard iteration	292
9.7	Surjectivity of gluing	293
9.8	Tubular neighborhoods and true boundary	294
10	Broken Fukaya algebras	299
10.1	A_∞ algebras	299
10.2	Composition maps	304
10.3	Homotopy units	308
10.4	Quilted disks	316
10.5	Quilted pseudoholomorphic disks	322
10.6	Homotopies	328

10.7 Homotopy equivalence: Unbroken to broken	339
10.8 Independence of perturbations in broken manifolds	344
11 Potentials for semi-Fano toric surfaces	347
11.1 Split perturbations	347
11.2 Potentials for semi-Fano toric surfaces	351
References	359
Index	365
