## **EMS Monographs in Mathematics**

Edited by Hugo Duminil-Copin (Université de Genève and Institut des Hautes Études Scientifiques), Gavril Farkas (Humboldt-Universität zu Berlin), Isabelle Gallagher (École normale supérieure de Paris and Université de Paris), and Paul Seidel (Massachusetts Institute of Technology)

The *EMS Monographs in Mathematics* is a book series aimed at mathematicians and scientists. It publishes research monographs from all fields of mathematics. The individual volumes are intended to give a comprehensive and self-contained account of their particular subject. They present mathematical results that are new or have not been accessible previously in the literature.

Previously published in this series:
