The *Memoirs of the European Mathematical Society* publish outstanding research contributions in individual volumes, in all areas of mathematics and with a particular focus on works that are longer and more comprehensive than usual research articles.

The collection's editorial board consists of the editors-in-chief of the *Journal of the European Mathematical Society* and the *EMS Surveys in Mathematical Sciences*, along with editors of book series of the publishing house of the EMS as well as other distinguished mathematicians.

All submitted works go through a highly selective peer-review process.

Latest titles in this series:

- A. Carey, F. Gesztesy, G. Levitina, R. Nichols, F. Sukochev, D. Zanin, *The Limiting Absorption Principle for Massless Dirac Operators, Properties of Spectral Shift Functions, and an Application to the Witten Index of Non-Fredholm Operators*
- J. Kigami, *Conductive Homogeneity of Compact Metric Spaces and Construction of p -Energy*
