

# Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
1.1	Motivation, examples, and links to classical topics . . . . .	1
1.2	Description of exposition . . . . .	8
1.3	Related questions . . . . .	9
<b>2</b>	<b>Setting and sketch of proof</b> . . . . .	11
2.1	Setting . . . . .	11
2.2	Locally concave functions . . . . .	18
<b>3</b>	<b>Patterns for Bellman candidates</b> . . . . .	23
3.1	Preliminaries . . . . .	23
3.2	Fence . . . . .	24
3.3	Tangent domains . . . . .	27
3.4	Chordal domains . . . . .	30
3.5	Around the cup . . . . .	33
3.6	Forces . . . . .	44
3.7	Linearity domains . . . . .	49
3.8	Combinatorial properties of foliations . . . . .	61
<b>4</b>	<b>Evolution of Bellman candidates</b> . . . . .	71
4.1	Simple picture . . . . .	71
4.2	Preparation to evolution . . . . .	76
4.3	Local evolution theorems . . . . .	82
4.4	Global evolution . . . . .	93
<b>5</b>	<b>Optimizers</b> . . . . .	99
5.1	Abstract theory . . . . .	99
5.2	Local behavior of optimizers . . . . .	102
5.3	Global optimizers . . . . .	117
5.4	Remarks concerning global conditions . . . . .	118
	<b>Index</b> . . . . .	131
	<b>Index of symbols</b> . . . . .	133
	<b>References</b> . . . . .	135
