

Contents

1	Morse theory and geometric estimates in neck regions	1
1.1	General introduction	1
1.2	The second derivative of the Willmore energy	16
1.3	Refined pointwise estimates on the second fundamental form	28
1.4	Proof of the main theorem for precompact conformal class	73
1.5	Improved energy quantisation for degenerating Riemann surfaces	101
1.6	Proof of the main theorem in the general setting	113
1.A	Appendix: Second derivative of the Willmore energy	115
2	Weighted eigenvalue problems for fourth-order operators in degenerating annuli	133
2.1	Introduction	133
2.2	First eigenvalue problem in dimension 2	140
2.3	Second eigenvalue problem	167
2.4	Second class of weighted Poincaré estimates	195
2.5	First minimisation problem in dimension 4	205
2.6	First minimisation problem in any dimension	216
2.7	Second eigenvalue problem in arbitrary dimension	228
2.A	Appendix	245
