Contents

1 Introduction 1

2 Preliminaries 5
2.1 Notation and basic definitions 5
2.2 Framework of proof of birational solidity 9
2.3 Methods of exclusion 12
2.4 Finding a Sarkisov generating set 14

3 Divisorial contractions to cE and $cD/2$ points 17
3.1 Generalities on the classification of divisorial contractions 19
3.2 Equivalence of germs 22
3.3 Divisorial contractions to cE points of discrepancy greater than 1 . . . 27
3.4 Divisors of discrepancy 1 over a cE point 32
3.5 Divisorial contractions to $cD/2$ points 37

4 Exclusions for some Fano 3-fold hypersurfaces 45
4.1 Curves and smooth points 45
4.2 Cyclic quotient singular points 48

5 Families № 100, 101, 102, and 103 53
5.1 Family № 100 54
5.2 Family № 101 60
5.3 Family № 102 66
5.4 Family № 103 72

6 Family № 110 81
6.1 Elementary links 81
6.2 Birational geometry of X 87
6.3 Birational geometry of $\widehat{X}$ 87
6.4 Birational geometry of $\breve{X}$ 92
