Contents

1 Introduction 1
- 1.1 Background 1
- 1.2 Stable motivic fibrant replacements 4
- 1.3 $\mathbb{A}^1$-connectivity 4
- 1.4 Strictly $\mathbb{A}^1$-invariant sheaves 5
- 1.5 What is done in this memoir? 7
- 1.6 The tf-topology 7
- 1.7 Main results 8
- 1.8 Scholium for strict $\mathbb{A}^1$-invariance 11
- 1.9 Further directions 13

2 Methods of proof, conventions, and notation 15
- 2.1 tf-motivic recollement 16
- 2.2 Outline of the proof of strict homotopy invariance 17
- 2.3 Conventions and notation 18

3 The trivial fiber topology 21
- 3.1 tf-coverings 21
- 3.2 Base change for points 26

4 The Nisnevich and tf-topology for closed immersions 29

5 Reduction to smooth affine schemes with trivial vector bundles 33

6 $\mathbb{A}^1$-locality and rigidity for closed immersions 39
- 6.1 The category Sm_{B*Z} and its Nisnevich site 39
- 6.2 $\mathbb{A}^1$-local and rigid presheaves on Sm_{B*Z} 40

7 The Nisnevich cohomology of generic fibers 51
- 7.1 Automorphisms and framed correspondences 53
- 7.2 Contracting framed $\mathbb{A}^1$-homotopies 56
- 7.3 Triviality of the cohomology on $(X^h_x)_U$ 62

8 Nisnevich strict and tf-Nisnevich strict $\mathbb{A}^1$-invariance 65
- 8.1 Counterexamples to Nisnevich strict $\mathbb{A}^1$-invariance 65
- 8.2 tf-Nisnevich strict $\mathbb{A}^1$-invariance 67

9 tf-localization by closed subschemes 71
9.1 tf-localization 71
9.2 Localization for motivic local objects 74
9.3 Framed tf-localization 74
9.4 $\mathbb{A}^1$-, Nisnevich, and tf-localization 76
9.5 Localization and tf-Nisnevich strict $\mathbb{A}^1$-invariance 79

10 Reduction from $\mathrm{Sm}_{B,Z}$ to Sm_Z 81

11 tf-Nisnevich strict homotopy invariance 85

12 tf-Nisnevich strict $\mathbb{A}^1$-invariance for abelian groups 87

13 Base change and localization for the tf-topology 91
13.1 Fundamental properties of base change functors 91
13.2 Deformation to closed subschemes 94
13.3 Localization theorem for tf-sheaves 98

14 Stable motivic localization for framed trivial fiber sheaves 101
14.1 Formal strict homotopy invariance and motivic infinite loop spaces . . 102
14.2 Properties of the endofunctor $\Omega_{\mathbb{G}_m}\mathscr{L}_{\mathbb{A}^1}$ 105
14.3 Motivic infinite loop spaces in $\mathrm{Pre}^{\mathrm{fr}}_{\mathrm{tf}}(B)$ 107

15 Stable motivic localization over one-dimensional base schemes 111
15.1 The stable motivic localization functor 111
15.2 Stably motivic local models for $\mathbb{P}^1$-suspension spectra 114
15.3 Motivic infinite loop spaces 115
15.4 Shifting the homotopy t-structure 115

A Essentially smooth schemes and henselian pairs 119

B Framed correspondences 125

C Nisnevich and tf-localization of framed presheaves 137

D Stabilization 141

E Telescopes and homotopy colimits 143

F Notation 147
F.1 Categories of schemes 147
F.2 Model categories 148
F.3 ∞-categories 149
