

ERRATUM TO:
**Hecke algebras, finite general linear groups,
and Heisenberg categorification**

Anthony Licata and Alistair Savage

The article “Hecke algebras, finite general linear groups, and Heisenberg categorification” appeared in *Quant. Topol.* **4** (2013), 125–185.

Due to a change in the syntax of the package TikZ, a change which occurred between the time the article was accepted and the time it was published, many lines in the diagrams were printed without indication of the corresponding direction (i.e. as simple lines instead of arrows). The electronic version of the article has been updated and is available at the webpage
