## Erratum to “From octonions to composition superalgebras via tensor categories”

---

In the paper [Alberto Daza-García, Alberto Elduque, Umut Sayin: From octonions to composition superalgebras via tensor categories, Rev. Mat. Iberoam. 40 (2024), no. 1, pp. 129–152, DOI [10.4171/RMI/1408](#)], in the first line of Section 3.2, the sentence

A unital composition algebra (or Hurwitz algebra) of dimension 2 is said to be *aligned* if its norm is isotropic.

need to be replaced by

A unital composition algebra (or Hurwitz algebra) of dimension 2 is said to be *split* if its norm is isotropic.

The regretful mistake was created by the publisher during the production process. They apologise to the authors and the readers for the inconvenience caused by it.
