

# Full Title

*To Professor XXX on the occasion of YYY*

by

First AUTHOR, Second CONTRIBUTOR and Someone ELSE

## Abstract

This is a sample paper for PRIMS. For the subject classification, use the 2010 Mathematics Subject Classification available at [www.ams.org/msc](http://www.ams.org/msc).

*Mathematics Subject Classification 2020:* .

*Keywords:* .

## §1. Introduction

Note that equation numbers are placed on the left. The examples below are included to illustrate some L<sup>A</sup>T<sub>E</sub>X constructions.

### §1.1. Theorems etc.

**Theorem 1.1** (Maximum Principle, see also [Sh, Theorem 5]). *If (...), then the following conditions are equivalent:*

- (i) *first item,*
- (ii) *second item.*

*Proof.* Observe that

(1.1) 
$$\begin{aligned} AAAAAAAAAA &= BBBBBBBBBBBB \\ &\quad + CCCCCCCCCC \\ &= DDDDDDDDDDDDDDD. \end{aligned}$$

S. Contributor:

S. Else (corresponding author):

Now apply induction on  $n$  to (1.1). □

**Definition 1.2.** A system  $S$  is said to be *admissible* if  $S \in B$ .

**Remark.** An unnumbered remark.

**Main Theorem 1.3.** *Here comes the statement of a numbered theorem with a fancy name.*

**1.1.1. Subsubsection.** This paragraph is only included to show the appearance of a subsubsection.
